MOVA I10 Cordless Upright Vacuum Cleaner

The MOVA I10 is a vacuum cleaner that combines powerful suction of 28,000 Pa with a lightweight design weighing just 1.35 kg, making cleaning comfortable and less tiring. Equipped with the TangleBuster™ Multi-Surface brush, it effectively handles both dust on hard floors and debris hidden in carpets. The 140° lighting system with Celeste Light technology makes it easy to spot even the tiniest particles, and the 170° swivel head allows you to reach under furniture and into hard-to-reach places. The vacuum cleaner provides up to 60 minutes of uninterrupted operation, and its multi-layer filtration system, 99.99% effective, traps dust and allergens, ensuring cleaner air.

Effective Vacuuming

The MOVA I10 is equipped with a TangleBuster™ Multi-Surface brush that combines soft bristles for picking up fine dust with stiff fibers that effectively remove dirt from carpets. The device automatically detects the type of surface and increases suction power on carpets and rugs to ensure

more thorough cleaning. Additionally, the Celeste Light illumination system with a 140° angle and a radius of up to 45 cm allows you to spot even the tiniest particles of dirt. The enhanced projection technology makes even hidden dust easy to remove.

Up to 60 minutes of runtime and a removable battery

The built-in 6×3000 mAh battery allows for up to 60 minutes of uninterrupted operation. Importantly, it can be removed and charged separately, and using an additional battery (not included) extends the runtime, allowing you to clean up to 163 m² of floor space. This is the perfect solution for larger apartments or homes.

User comfort

The MOVA I10 is designed to make daily cleaning as hassle-free as possible. Its lightweight construction (just 1.35 kg) means you can easily lift it with one hand, for example, when vacuuming high-hanging curtains. The vacuum cleaner's hose bends up to 170° forward and backward, allowing the I10 to lie almost flat, providing easy access under furniture as low as 10 cm. It also rotates 90° left and right, making it easy to maneuver around furniture legs and corners.

High suction power and cyclonic system

The motor, which generates 28,000 Pa of suction power, handles dust, hair, and fine debris even in hard-to-reach places. The Multi-Cone Cyclonic system is responsible for its effectiveness, separating dust from the air, reducing filter wear, and maintaining consistent suction power for longer. This solution not only allows for more thorough cleaning but also extends the device's service life without the need for servicing.

Advanced filtration - cleaner air at home

Thanks to a filtration system with up to 99.99% efficiency, the MOVA I10 traps fine pollen, dust, and dust mites, ensuring the quality of the air in your environment. This is particularly important for allergy sufferers, pet owners, and people with sensitive skin.

Customize the device to your needs

Thanks to the LED display on the handle, you can easily check the battery level and the selected operating mode. The MOVA I10 offers two modes: Eco, which is ideal for daily cleaning of light dirt, and Turbo—activated for heavier dirt or for picking up pet hair from carpets and furniture. You can also convert the device into a handheld vacuum for sofas, mattresses, hard-to-reach corners, or car interiors. An additional mini electric brush helps remove dust mites from soft surfaces, reducing the risk of allergies.

Convenient storage

The set includes a multifunctional docking station (docking station, charging base, and accessory organizer) that allows you to charge the device and store accessories at the same time. This ensures the vacuum cleaner is always ready to use and doesn't take up unnecessary space.

Included

- vacuum cleaner body
- tube
- TangleBuster brush
- mini electric brush
- multifunctional nozzle
- 2-in-1 charging and storage station

Manufacturer	MOVA
