

MOVA G70 Upright Vacuum Cleaner

Model: G70

Manufacturer: MOVA

EAN: 6977728949956

Product Code: 1663993

R6,606

MOVA G70 upright vacuum cleaner

MOVA G70 streamlines cleaning throughout the home, combining high suction power with solutions that save time and effort. OptiInsight™ technology with dual brushes and a robotic arm precisely cleans edges and corners, eliminating hard-to-reach dirt. With its anti-hair entanglement design, LED lighting, telescopic wand and 5-layer filtration, the device effectively takes care of the cleanliness of floors and air in your home.

Effective vacuuming of any surface

With a high-performance motor and dual brushes for different floor types, the MOVA G70 effectively removes dust, dirt and pet hair from carpets, panels and tiles. The suction power of 225 AW (33.9kPa) eliminates even deeply embedded dust, so vacuuming requires fewer passes and takes less time. The constant suction power guarantees thorough cleaning of any surface - from the living room to the hallway - without having to repeat the same motions over and over again.

Clean to the edges

With OptilInsight™ technology and a robotic arm, the MOVA G70 thoroughly vacuums right up against walls and furniture, leaving no dust behind. The 0-gap system makes sure the brush reaches areas that normally require separate cleaning. Rubber strips on the roller prevent tangles, and OptilInsight™ technology makes hidden dirt visible for even more thorough cleaning.

One device for all tasks

The MOVA G70 vacuum cleaner effortlessly adapts to different needs around the home. The 6-piece telescopic wand allows you to set the perfect length, so you can easily reach under furniture as well as high shelves. A set of tips allows you to clean upholstery, curtains and crevices, and the lightweight design (1.93 kg) makes cleaning easy. The OLED screen and the ability to wash selected components further facilitate daily use.

Longer cleaning without interruptions

The MOVA G70 uses an eight-cell battery with a total capacity of 2,500 mAh, which provides up to 90 minutes of uninterrupted use. This makes it easy to vacuum your entire apartment on a single charge - without having to stop cleaning.

Included:

- Vacuum cleaner body
- Double brush for different surfaces
- Telescopic tube
- Brush with motor
- 2-in-1 nozzle
- Crevice nozzle
- Wall holder
- Accessory holder
- Charger
- Carpet roller
