MOVA Stellar X10 air purifier

MOVA Stellar X10 is a compact air purifier designed for everyday comfort - it will work well in rooms of 10-15 m². The device combines effective air purification with a gentle cooling function, creating a pleasant environment for work and rest. Thanks to the unique Golden 45° Air Shield technology, it directs purified air directly towards the user. In addition, the anti-allergy filter used captures and neutralizes particles of pollen, dust and other allergens.

Golden 45° Parabolic Air Shield technology

The MOVA X10 purifier uses a specially designed air stream at a 45° angle, which creates a so-called parabolic shield. The purified air rises gently and falls exactly where you are and does not disperse in other directions. This solution will work especially well for people with allergies, sensitive respiratory systems or children.

Anti-allergy filter - fewer allergens, more comfort

The HEPA filter used in the device effectively captures and breaks down particles of pollen, dust, dander and other allergens. The MOVA X10 eliminates up to 99.98% of pollutants and 99.99% of bacteria, significantly improving indoor air quality. This is a real relief during pollen season and in homes with allergy sufferers.

Cooling and purification function in one unit

In addition to purification, the MOVA X10 also offers a gentle cooling function. The device generates a pleasant, cool breeze that improves comfort on warm days - without the need for additional fans. Thanks to the infinitely adjustable airflow, you can precisely adjust the operation to your needs.

Quiet operation and infinitely variable speed control

The purifier works extremely quietly - the noise level is only 27 to 45 dB (depending on the mode), which allows you to use the device even in the bedroom, without disturbing your sleep. In addition, infinitely adjustable fan speed gives you full control over the intensity of the airflow.

Intuitive operation and control through the app

MOVA X10 is equipped with an easy-to-read air quality indicator in the form of a smiley face. In addition, the purifier can be controlled remotely via the MOVAhome app. This gives you access to all settings and allows you to check the air quality in the room even while you are away from home.

Included

- air purifier
- HEPA filter
- user manual
