MOVA Stellar X10 Plus Air Purifier (Gold)

Model: X10 Plus

Manufacturer: MOVA

EAN: 6978794731520

Product Code: 1663997

R7,151

MOVA Stellar X10 Plus Air Purifier (Gold)

The MOVA Stellar X10 Plus is designed to ensure peaceful sleep and comfortable breathing every day, exactly where it matters most. Precise airflow directs purified air directly to your breathing zone, creating a personal space of cleanliness and freshness. The advanced filtration system ensures air free of allergens, dust, and unpleasant odors, providing relief during the day and at night. Smooth airflow control and quiet operation allow you to adjust the device to suit your mood, the time of day, and the conditions in the room. Clear visualization of air quality and control via the app make controlling your home microclimate intuitive, enjoyable, and always at your fingertips.

Precise purification at a 45° angle

Instead of purifying the entire room "along the way," the Stellar X10 Plus directs purified air exactly where it is most needed—to your breathing zone. The front air outlet operates at an optimal 45° angle, lifting the stream of fresh air upward and directing it toward your face immediately after the

device is turned on. What's more, the specially designed slanted airflow path eliminates the problem of unpleasant, direct airflow on the face. This provides noticeable protection without unnecessary waiting for the room to be purified, which will be particularly appreciated by allergy sufferers and people with respiratory hypersensitivity.

A dome of clean air around your head

The airflow in the MOVA Stellar X10 Plus moves in a parabolic trajectory. First, it rises upward and then naturally descends, gradually enveloping your head and face. This creates a kind of dome of clean air that maintains high air quality exactly where you breathe, without disturbing the natural flow in the room. As the purified air begins to surround your head steadily, a zone of gentle positive pressure is created. This micro-effect of positive pressure acts as an invisible barrier, limiting the inflow of polluted air from the environment.

Anti-allergen filtration without the risk of contamination

At the heart of the purifier is an advanced, multi-layer filtration system that effectively eliminates allergens at the source. The precious metal-based allergen-decomposing coating, H13 HEPA filter, and anti-backflow design prevent the filter from becoming "saturated," which in traditional solutions can lead to secondary allergen emissions. The whole is complemented by a complete filtration structure comprising a pre-filter, an anti-allergen layer, a HEPA filter, and an activated carbon layer, guaranteeing comprehensive air quality protection.

Cooling and purification in one

MOVA Stellar X10 Plus is both a purifier and an effective source of pleasant cooling. The device combines both functions in one compact solution, saving space and eliminating the need for separate equipment. With an airflow speed of up to 6.4 m/s, which is up to 80% higher than in standard purifiers, air circulates faster throughout the room, improving filtration efficiency and thermal comfort.

Fast circulation, freshness, and lightness of air

The micro-perforated pressure diffusion technology and 360-degree air intake system allow you to instantly set the air in the entire room in motion. The purifier effectively dissipates accumulated heat and moisture, quickly refreshes the space, and leaves the air light, pleasant, and noticeably cooler—ideal conditions for sleep and relaxation.

Smooth airflow control inspired by nature

The MOVA Stellar X10 Plus uses a proprietary, stepless airflow control system, supported by a powerful brushless DC motor. Instead of fixed speed levels, you get full, intuitive control over the airflow, exactly as you need it at any given moment. With a noise level of only 27 dB, the device remains virtually inaudible, perfectly suited to the needs of light sleep and nighttime rest.

Intuitive operation

The innovative spherical control design has been designed for maximum ease of use. A gentle upward movement of the control gradually increases the airflow intensity, while a downward movement smoothly reduces it. A backlit, multi-color LED ring combined with animated emotion icons presents the current air status in a friendly and intuitive way. Plus, with integration with the MOVAhome app, you can manage air quality from anywhere.

Automation tailored to your rhythm

The intelligent automatic mode independently adjusts the airflow speed based on sensor readings, ensuring optimal air quality without the need for manual intervention. You can also set your preferred intensity level, adjust the operating schedule from 1 to 24 hours, and activate night mode, which combines quiet operation with soft lighting to create the perfect conditions for uninterrupted sleep. The Stellar X10 Plus version has been specially designed to work at night, purifying the air in your sleeping area before you fall asleep and maintaining its high quality throughout the night.

Included in the set

- air purifier
- HEPA filter
- power supply
