Product Code: 1664008

R11,642

MOVA S70 Roller cleaning robot (white)

The MOVA S70 Roller is a cleaning robot that combines efficient vacuuming with floor mopping. The HydroForce™ Mopping system, 28,000 Pa suction power, and MaxiReach™ technology ensure thorough cleaning of the entire surface—right up to the edges. The whole thing is complemented by an automatic All-in-One station, which means that daily cleaning requires minimal effort.

Smudge-free cleaning with the HydroForce™ system

HydroForce™ Mopping technology provides intensive floor cleaning with a constant supply of fresh water. The mop roller is continuously rinsed by 12 spray nozzles, and dirty water is immediately directed into a separate tank. High pressure of 4700 Pa and effective dirt removal with each roll rotation allow you to remove dried stains, grease, and everyday dirt—without smearing or streaking.

High suction power for everyday dirt

The motor generates 28,000 Pa of suction power to effectively collect dust, hair, fur, and larger debris from hard floors and carpets. The optimized airflow design allows you to remove dirt in a single pass while maintaining quiet and stable operation of the robot.

Thorough cleaning of edges and corners

The MaxiReach™ Tech system enables true edge-to-edge cleaning. The 25.6 cm wide extendable roller and smart side brush reach baseboards, corners, and spaces around furniture. Active roller pressure and fresh water supply allow you to remove dirt where standard robots usually cannot reach.

Slim design and precise navigation

The CovertSense™ Navigation system with DToF laser precisely maps the space and plans cleaning routes. The slim housing, only 90 mm high, allows it to fit under sofas, beds, and cabinets, effectively removing dust and pet hair from hard-to-reach places. The robot efficiently avoids obstacles and moves smoothly throughout the apartment.

Smooth transitions between rooms

With the ability to overcome obstacles up to 22 mm high, the MOVA S70 Roller robot easily handles thresholds, baseboards, and minor unevenness. This ensures continuous cleaning without stops or manual assistance, even in homes with varying floor heights.

An automatic station that does the work for you every day

The All-in-One station takes care of the robot's routine maintenance. It automatically empties the dust container, refills the robot's water tank, washes the roller with hot water up to 80°C, and dries it with air at 70°C. The four-stage cleaning system allows you to adjust the temperature to the level of dirt, and the large dust bag allows for long operation without frequent emptying.

Large capacity and easy maintenance

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

The 5-liter clean water tank in the station and the 160-ml tank in the robot allow you to thoroughly clean your entire home without frequent refilling. In addition, the side brush, which is resistant to hair tangling, and the optional CleanChop™ 3.0 brush reduce strand and hair winding, which translates into easier maintenance and a longer service life for the device.

Included:

- Cleaning robot
- Base station
- Base station ramp extension plate
- Dust bag (installed)
- Roller (installed)
- Side brush (installed)
- Cleaning plate
- Main brush (installed)
- Dust container (installed)
- Dust container filter (installed)
- User manual

Manufacturer	MOVA
Model	S70 Roller
Color	White
Dimensions of the cleaning robot	350 × 350 × 90 mm
Dimensions of the base station	340 × 255 × 503 mm
Minimum height of the robot	90 mm
Navigation system	CovertSense™ Navigation (built-in DToF)
Obstacle avoidance	Dual laser line + Edge-DToF laser
Max. obstacle clearance height	22 mm
Suction power	28,000 Pa
Main brush type	Rubber brush and CleanChop™ Brush 3.0 (optional)
Side brush lift	Yes

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Side brush extension	Yes
Mop roller retraction	Yes
Mop roller lift	14 mm
Battery capacity	5200 mAh
Water tank capacity	5 l (clean) / 4.5 l (used)
Automatic roller cleaning with hot water	Yes, up to 80°C
Roller drying	Yes, with hot air at 70°C
Dust bag capacity	3.2 l
Dust container capacity in the robot	240 ml
