

MOVA S70 Roller RVC (black)

Model: R5769H

Manufacturer: MOVA

EAN: 6978794731797

Product Code: 1664009

R10,610

MOVA S70 Roller Cleaning Robot (Black)

The MOVA S70 Roller is a cleaning robot that combines powerful vacuuming with floor mopping. The HydroForce™ Mopping system, 28,000 Pa of suction power, and MaxiReach™ technology ensure thorough cleaning of the entire surface—right up to the edges. The package is rounded out by the All-in-One automatic docking station, which minimizes the effort required for daily cleaning.

Streak-free mopping thanks to the HydroForce™ system

HydroForce™ Mopping technology ensures intensive floor cleaning with a constant supply of fresh water. The mopping roller is continuously rinsed by 12 spray nozzles, and dirty water is immediately directed into a separate tank. High pressure of 4,700 Pa and effective dirt pickup with every rotation of the roller allow you to remove dried-on stains, grease, and everyday dirt—without smearing or leaving streaks.

High suction power for everyday dirt

The motor, which generates 28,000 Pa of suction power, effectively picks up dust, hair, pet hair, and larger debris from hard floors and carpets. The optimized airflow design allows it to remove dirt in a single pass, while maintaining quiet and stable operation.

Thorough cleaning of edges and corners

The MaxiReach™ Tech system enables true edge-to-edge cleaning. The 25.6 cm-wide extendable roller and intelligent side brush reach baseboards, corners, and the spaces around furniture. Active roller pressure and a fresh water supply allow it to remove dirt in places standard robots usually can't reach.

Slim Design and Precise Navigation

The CovertSense™ Navigation system with a DToF laser precisely maps the space and plans cleaning routes. The slim body, just 90 mm high, allows it to slide under sofas, beds, and cabinets, effectively removing dust and pet hair from hard-to-reach places. The robot efficiently avoids obstacles and moves smoothly throughout your home.

Seamless Movement Between Rooms

Thanks to its ability to overcome obstacles up to 22 mm high, the MOVA S70 Roller effortlessly handles thresholds, baseboards, and minor unevenness. This ensures uninterrupted cleaning without stoppages or the need for manual assistance—even in apartments with varying floor heights.

An automatic station that takes care of daily tasks for you

The All-in-One station takes care of routine robot maintenance. It automatically empties the dust bin, refills the robot's water tank, washes the roller with hot water up to 80°C, and dries it with air at 70°C. The four-stage cleaning system allows you to adjust the temperature based on the level of dirt, and the large dust bag enables extended operation without the need for frequent emptying.

Large Capacity and Easy Maintenance

The 5-liter clean water tank in the docking station and the 160-ml tank in the robot allow for a thorough cleaning of the entire apartment without frequent refilling. Additionally, the side brush—which is resistant to hair tangling—and the optional CleanChop™ 3.0 brush minimize the tangling of hair and pet fur, resulting in easier maintenance and a longer service life for the device.

Included in the set:

- Robot vacuum
- Docking station
- Docking station ramp extension plate
- Dust bag (installed)
- Roller (installed)
- Side brush (installed)
- Cleaning plate
- Main brush (installed)
- Dust bin (installed)
- Dust bin filter (installed)
- User manual

Manufacturer	MOVA
Model	S70 Roller
Color	Black
Cleaning robot dimensions	350 × 350 × 90 mm
Base station dimensions	340 × 255 × 503 mm
Minimum robot height	90 mm
Navigation system	CovertSense™ Navigation (built-in DToF)
Obstacle avoidance	Dual laser line + Edge-DToF laser
Max. obstacle clearance height	22 mm
Suction power	28,000 Pa
Main brush type	Rubber brush and CleanChop™ Brush 3.0 (optional)

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
