MOVA S7 Ultra Cordless Vacuum Cleaner

The MOVA S7 Ultra is a cordless upright vacuum cleaner designed for quick and thorough cleaning of your entire home. Its powerful 680 W motor generates up to 220 AW of suction power, ensuring stable and effective performance on any surface. Thanks to its cordless design and smart features, the vacuum cleaner is ideal for both everyday cleaning and deep cleaning.

Effective vacuuming of any surface

The universal brush is equipped with two types of rollers – for carpets and hard floors. The V-shaped bristles effectively comb out dust and hair from deep within carpets, while the soft roller thoroughly collects dirt from panels, tiles, and parquet without scratching their surfaces. This means that one device is enough to clean the entire house.

Intelligent power adjustment – always as much as you need

The Smart Dirt Detection system automatically detects the amount and size of dirt, adjusting the power level in real time. When the vacuum cleaner encounters more dirt, it increases the intensity for more thorough cleaning, and when there is less dirt, it reduces it to save energy. The result is effective cleaning without the need to switch modes manually.

Up to 80 minutes of continuous operation

A powerful 2500 mAh battery, consisting of 7 cells, allows for up to 80 minutes of cordless cleaning on a single charge. Consistent, high suction power is maintained throughout the entire cycle, and the replaceable battery makes charging easy and extends usage time. It's the perfect solution for larger apartments and houses.

Reaches where a regular vacuum cleaner cannot

The included adapter allows for convenient cleaning under low furniture, beds, and sofas without having to bend down. The flexible design allows you to set the optimal working angle, increasing the range and effectiveness of cleaning hard-to-reach areas.

Cleaner air thanks to advanced filtration

The 12-cone cyclonic filtration system and 5-layer filter system trap up to 99.9% of particles as small as 0.3 µm. Dust, allergens, and fine debris remain in the vacuum cleaner, and cleaner air returns to the room – the perfect solution for allergy sufferers, families with children, and pet owners.

Easy to use and hygienic emptying

The dust container is equipped with a one-touch cleaning mechanism that knocks dust off the filter and walls without having to touch the dirt. The filter and dust container can be easily removed and rinsed under running water, making it easy to clean quickly and maintain the full performance of the device.

Solutions for convenience

The clear OLED screen shows the charge level and current operating mode. The vacuum cleaner operates in AUTO mode by default, and you can switch between power levels with a single button. The green LED backlight reveals fine dust and dirt invisible to the naked eye, and the integrated station allows you to charge and store accessories in one place.

Included:

- Vacuum cleaner body
- Illuminated universal brush for all surfaces
- Crevice nozzle
- Multifunctional nozzle
- Motorized mini brush
- Extension tube
- 2-in-1 wall mount for charging and storage
- Adapter
- Soft velour roller
