

MOVA Z70 Ultra Roller Complete RVC Cleaning Robot

Model: RLZ72CE-1

Manufacturer: MOVA

EAN: 6978794732879

Product Code: 1664014

R23,792

MOVA Z70 Ultra Roller Complete RVC Cleaning Robot

The MOVA Z70 Ultra Roller Complete RVC is an advanced cleaning robot that combines highly effective vacuuming with innovative roller mopping and a fully automatic docking station. It offers suction power of up to 36,000 Pa, mop roller pressure of 18 N (5,000 Pa), and the intelligent HydroForce™ Mopping 2.0 system. Thanks to FlexScope™ Navigation technology, the device lowers its height to just 96 mm, and the StepMaster™ 2.0 solution allows it to overcome obstacles with a total height of up to 9 cm (4.8 + 4.2 cm). A 6,400 mAh battery with Quick Flash Charge, recognition of over 300 obstacles, and a nearly maintenance-free docking station with a 4-liter dust bag ensure maximum convenience and exceptional cleaning performance. Also noteworthy are its elegant, minimalist design and a user-friendly app.

HydroForce™ Mopping 2.0 - floors sparkling with cleanliness

Instead of traditional mop pads, the device uses an advanced mopping roller that is continuously refreshed during operation. A system of 12 precision nozzles evenly distributes clean water across its entire width, while 18 N of pressure helps remove dried-on stains and tough dirt. 360° Powerful Dirt Scraping technology and instant dirty water extraction ensure the floor remains clean, nearly dry, and streak-free after every pass.

Real-Time Mop Fluffing - a mop roller that's always effective

During operation, the mop roller fibers are automatically fluffed at speeds of up to 800 rpm, which helps maintain their fluffiness and full cleaning effectiveness. This prevents the material from clumping and ensures consistent mopping performance even with heavy use. This solution can increase cleaning effectiveness by up to 30%!

36,000 Pa of suction power and a 4-stage Anti-Tangle system

The powerful 36,000 Pa suction effectively removes dust, pet hair, and larger debris from floors and carpets. Additionally, the robot features a 4-stage anti-tangle system that includes an omni-wheel, a side brush, a specially designed roller, and the TroboWave™ DuoBrush main brush. It's the perfect solution for homes with pets—and more!

AutoShield™ - Safe Carpet Cleaning

When a carpet is detected, ultrasonic sensors automatically activate AutoShield™ technology. A special shield limits moisture contact with the surface, the mop roller lifts up to 13 mm, and the side brush up to 10 mm. At the same time, suction power is increased. This keeps carpets dry while effectively removing dirt without the risk of wetting the fibers.

FlexScope™ Navigation - an improved navigation system

The retractable DToF sensor enables precise 360° panoramic scanning, allowing for the planning of optimal cleaning routes. When the sensor is retracted, the robot's height is reduced to just 96 mm. This allows the device to easily slide under sofas, beds, and other low furniture, effectively removing dust from hard-to-reach places.

StepMaster™ 2.0 and MaxiReach™ 2.0 - cleaning without limits

The robot is equipped with StepMaster™ 2.0 robotic legs, which allow it to navigate thresholds and obstacles with a total height of up to 9 cm (4.8 + 4.2 cm). Meanwhile, MaxiReach™ 2.0 technology extends both the side brush and the mop roller, ensuring full coverage of edges and corners.

Smart Obstacle Avoidance and Video Monitoring

The Smart Obstacle Avoidance system uses two 3D structured light modules, RGB AI SmartSight technology, LED lighting, and a side laser to effectively detect objects and edges in various conditions. The robot recognizes over 300 types of objects, and the InfiniteEye™ feature available in the app allows you to define your own obstacles, safe distances, and areas requiring more attention. Additionally, the device offers a video preview, enabling you to remotely check the situation at home.

A docking station that handles almost all the work

The included docking station automatically sucks up collected dust into a 4-liter bag, providing up to 125 days of operation without the need for manual emptying. It also washes the mop roller with water up to 100°C, dries it with hot air (70°C) in about 1 hour, and uses UV light for sterilization. The DuoSolution™ system automatically dispenses two types of cleaning agents—one for stain removal and the other for neutralizing pet odors. Furthermore, large water tanks (5.5 L for clean water, 4.5 L for dirty water) allow for cleaning up to 1,300 m² without the need for manual refilling.

High-capacity battery and fast charging

The 6400 mAh battery ensures long runtime, and Quick Flash Charge technology reduces downtime between cleaning cycles. An intelligent protection system monitors charging parameters, ensuring the durability and safety of the equipment. Energy recovery efficiency is up to 30% higher compared to previous generations!

Included

- Cleaning robot x1

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. - Docking station x1
- Docking station ramp extension x1
- Automatic detergent dispenser module with two compartments x1
- Anti-scale agent x1
- User manual x1
- Warranty card x1
- Quick start guide x1
- Power cord x1
- Side brush x1
- Mop roller x2
- Dust bag x2
- HEPA filter x1
- Cleaning solution 1000 ml x1
- Cleaning solution 200 ml x1

Manufacturer	MOVA
Model	Z70 Ultra Roller Complete
Min. robot height	96 mm
Navigation system	FlexScope™ Navigation
Obstacle avoidance system	Dual 3D Structured-Light + RGB AI + LED + Edge Line Laser
Obstacle clearance	Up to 90 mm (48 mm + 42 mm)
Suction power	36,000 Pa
Main brush type	Anti-Tangle TroboWave™ DuoBrush
Omni-wheel with anti-tangle system	Yes
Main brush lift	Yes
Side brush lift	Yes
Side brush extension	Yes
Mopping with detergent	Yes
Mop roller extension	Yes

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Mop roller lift	Up to 13 mm
AutoShield™	Yes
Battery capacity	6400 mAh
Clean water tank capacity (docking station)	5.5 L
Dirty water tank capacity (docking station)	4.5 L
Dust bag capacity (docking station)	4 L
Hot water roller cleaning	Yes, at 100°C
UV sterilization	Yes
Automatic detergent dispensing	DuoSolution™ (two compartments)
Mop roller drying	Yes, at 70°C, approx. 1 hour
Dirt detection	Yes
Video monitoring	Yes
Voice control	Robot-based
Status indicator light	CyberFlow™
Obstacle personalization feature	InfiniteEye™
Adaptive LED lighting	Yes
