MOVA Z200 Stick Vacuum

Win the battle against dust. The MOVA Z200 cordless upright vacuum cleaner combines 180 AW of power with 30,000 Pa of suction power, ensuring effective removal of pet hair, human hair, and larger debris from various surfaces. The innovative base with an automatic dust collection system, a 1.2-liter dust bag, and an efficient HEPA H14 filter help reduce the frequency of maintenance and ensure cleaner air in your home. The device offers up to 90 minutes of runtime, automatically adjusts its suction power to the level of dirt, and, thanks to its lightweight design (1.55 kg), ensures comfortable use.

Innovative Automatic Dust Collection System

The MOVA Z200 stands out with its modern dust collection system, which transports debris in real time directly into a sealed bag located in the base of the unit. This solution minimizes contact with dirt while reducing the need to empty the dustbin. It takes just one push of a button to replace the bag quickly and hygienically. The 1.2-liter capacity lasts for up to 45 days.

Power That Handles Any Dirt

High cleaning performance is ensured by a brushless motor generating 180 AW of power and 30,000 Pa of suction power. These specifications allow for the efficient removal of dust, crumbs, pet hair, and other debris from both hard floors and carpets. The intelligent dirt detection system analyzes the level of dirt on the surface and automatically adjusts the cleaning intensity, ensuring optimal performance and efficient energy use.

No More Hair Tangling in the Brush

The vacuum cleaner is equipped with an improved brush featuring a dual anti-tangling system. The spiral design of the roller guides hair and pet hair directly into the suction opening, while a special comb separates them from the brush surface, reducing buildup around rotating parts. The separated strands are immediately drawn into the vacuum, resulting in smoother operation and reducing the need for manual brush cleaning.

LED lighting—spot hidden dust

The wide-angle green light built into the brush helps you spot fine dust and dirt that usually remain invisible. This allows you to clean more thoroughly under furniture, along baseboards, and in dimly lit areas.

HEPA H14 filtration and odor-reduction mode

The HEPA H14 filter traps up to 99.99% of fine particles, resulting in more effective purification of the air exiting the device. The system helps reduce the presence of dust and fine contaminants in your home environment. Additionally, a special mode helps reduce unpleasant odors associated with dust, pet dander, and other contaminants that accumulate while the unit is in storage.

Advanced Airflow System

The MOVA Z200 model is equipped with an automatic air duct cleaning function. After the unit stops running, the system activates automatically, removing dust residue from inside the unit and the entire airflow system. This solution prevents contaminants from being recirculated, helps maintain

high performance, and reduces the need for additional maintenance.

Quiet operation that’s friendly to household members and pets

In operating mode, the vacuum cleaner generates noise levels below 65 dB. This makes daily cleaning less disruptive for household members and pets, and allows the device to be used at various times of the day.

Smart solutions for greater convenience

The integrated storage system lets you conveniently organize your accessories, ensuring that all the necessary attachments are always within reach. The set includes, among other things, a backlit multi-purpose brush, a wide multi-purpose nozzle, a crevice tool, and a motorized mini-brush, which make it easier to clean various surfaces and hard-to-reach areas. An additional convenience is the smart LED display, which shows key information about the device’s operation, battery level, and the currently selected operating mode.

Included in the set

- Main unit
- Extension tube
- Multifunctional brush for various surfaces (with backlight)
- Crevice tool
- Wide multifunctional nozzle
- Motorized mini brush
- Dust bags x4
- Battery
- Charger
- Accessory holder
- Wall mount
