Discover a new quality of communication with Rally microphone panels, allowing you to expand conversations in any space. With the ability to add up to three panels, you gain not only a wider sound reception range but also convenient access to mute functions, translating to even greater freedom in discussions. Perfect for office meetings or video conferences, these panels ensure sound clarity and professionalism, which are essential in today's remote work and online collaboration environment. Enjoy full control over sound, creating optimal conditions for every discussion.

Revolution in Remote Meetings with Modern Technology

In the era of remote work, ensuring effective communication becomes crucial, and intelligent video artificial intelligence answers these needs. With advanced sound recording and innovative noise suppression, every meeting participant can enjoy crystal-clear sound and image, leading to more natural interactions. The continuous software improvement system guarantees that this solution adapts to changing conditions, providing optimal experiences for every meeting. This enables remote employees to fully engage and communicate comfortably, eliminating barriers that may exist in traditional forms of remote collaboration.

Remote Management of Rooms and Devices in the Cloud

REMOTE MANAGEMENT WITH SYNC is an innovative solution that allows full control over the status of rooms and devices in real-time. With simultaneous access to data on a single cloud platform, users can easily monitor, update, and modify settings, significantly increasing management efficiency. Regardless of location, SYNC provides a sense of complete control and flexibility, eliminating the need for physical presence in a given place. This is an ideal option for companies looking to streamline operational processes and enhance efficiency in a dynamically changing environment.
