

Hikvision DS-1280ZJ-DM21 Junction box

Model: DS-1280ZJ-DM21

Manufacturer: HIKVISION

EAN: 6954273658762

Product Code: 1664747

R842

Designed for compatibility with specific Hikvision camera models, including the DS-2CD2712 and DS-2CD2732, this junction box is a functional accessory for camera installation. Crafted from durable aluminum, it ensures a robust housing and mount solution that can withstand various environmental conditions. The white finish provides a clean, unobtrusive look that blends seamlessly with most surroundings.

This junction box facilitates a more organized and secure installation by concealing cables and connections, protecting them from potential damage or tampering. Its universal design is tailored to support specific models from Hikvision Digital Technology, enhancing the effectiveness and longevity of your security setup.

The construction not only promotes enhanced security through a stable mounting platform but also aids in maintaining the aesthetic integrity of the installation area. Easy to install, it allows for a straightforward setup process, ensuring that your security system is up and running without unnecessary delays. This junction box is an essential component for anyone looking to create a
