R3,349

The PHO 18V-20 Cordless Planer is designed for easy, high-quality wood and board planing. When finishing surfaces, chamfering edges or handling light construction projects, this compact and powerful tool is comfortable to use and packed with features for reliable results. A patented single-blade system ensures a clean planing performance and hassle-free blade changes. Thanks to double-sided chip ejection, planing can be undertaken from either side – perfect when working in tight spots or close to walls. Control wood trimming or shaving levels using the accurate depth gauge, featuring 0.25 mm increments. The precision-machined base plate helps the planer glide smoothly across workpieces for a professional finish. Check current power levels at a glance with the handy battery indicator. This planer is part of the 18V POWER FOR ALL system – one battery can be used across all 18V POWER FOR ALL tools.
