Equip Cat.6A RJ45 Plug Set, 100pcs/pack

Model: 121176

Manufacturer: EQUIP

EAN: 4015867233900

Product Code: 1666091

R1,129

The Equip Cat 6A RJ45 Plug Set is to provide you with the necessary connectors to terminate Cat 6A Ethernet cables. These plugs are typically used in networking and telecommunications applications where high-speed data transmission is required, and the Cat 6A standard is preferred due to its ability to support data rates of up to 10 Gbps over longer distances.

100pcs/pack: This indicates that the package contains 100 individual RJ45 plugs. This is useful for bulk installations or when you need to terminate multiple Ethernet cables. Having 100 plugs in a pack ensures that you have an adequate supply for your networking needs.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
