

LevelOne 1.25Gbps Multi- mode SFP Transceiver, 550m, 850nm

Model: GVT-0300

Manufacturer: LEVEL ONE

EAN: 4015867103654

Product Code: 1667730

R1,284

Product Overview

The LevelOne GVT-0300 SFP (Small form-factor pluggable) fiber optic transceiver provides fullduplex connectivity over multi-mode fiber at distances up to 550 meters. GVT-0300 is designed for use in Gigabit Ethernet networks to provide an IEEE-802.3z-compliant link for 1.25 Gb/s speeds to serve short-range applications. GVT-0300 operates at a nominal wavelength of 850nm and complies with a Multi-Source Agreement (MSA) for compatibility between manufacturers. It comes with a click-and-latch

LC connector for a solid connection into the SFP port.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Multi-Purpose Usage

GVT-0300 can be used for distributed multiprocessing, switch-to-switch, converter-to-switch, or converter-to converter interfaces, high-speed I/O file transfer, bus extension applications, and as a channel extender in data storage applications.

LevelOne GVT-0300 can be used in any LevelOne switch or converter that can accommodate SFP (Mini-GBIC) transceivers.

- Small Form Factor Pluggable MSA compliant
- For Multi-mode Applications
- Up to 850nm & 1.25Gbps
- Compliant for IEEE802.3z Gigabit Ethernet
- Easy to install and Hot-pluggable
- Connect switches up to 550m away with each other
- Single 3.3V power supply
- Duplex LC Connector
- TTL signal detect indicator
- EEPROM with serial ID functionality
