Brother TZE631S label-making tape Black on yellow TZe

Model: TZE631S

Manufacturer: BROTHER

EAN: 4977766736640

Product Code: 1669619

R810

This black on yellow 4m x 12mm tape is for use with our PTP300BT, PTH110, PT2030, PTD400, PTD600, PT2730 and PTP700, PTP750W, PTE100VP, PTE300VP, PTE550WVP label makers.

Our TZe tapes can be used to label far more than just stationery and containers. Due to their unique laminated design, these labels can withstand abrasion, chemicals, water, hot and cold temperatures, and harsh light.

Unlike many consumer labels, Brother labels can be used outside, in the freezer, in the dishwasher and in the garden. They’re also the most hygienic label on the market – they can be used in labs and hospitals as well.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

This black on yellow 4m x 12mm tape is for use with our PTP300BT, PTH110, PT2030, PTD400, PTD600, PT2730 and PTP700, PTP750W, PTE100VP, PTE300VP, PTE550WVP label makers.

Our TZe tapes can be used to label far more than just stationery and containers. Due to their unique laminated design, these labels can withstand abrasion, chemicals, water, hot and cold temperatures, and harsh light. Our Flexible ID Tape is made

with special adhesive that sticks well to insulations and to itself, making this label perfect for wire wrapping, cabling and for use on other curved surfaces.

Unlike many consumer labels, Brother labels can be used outside, in the freezer, in the dishwasher and in the garden. They're also the most hygienic label on the market – they can be used in labs and hospitals as well.

TZ and TZe labels have an extra-strength adhesive; they'll stick –and stay stuck – to acrylic, glass, OVC, stainless steel and even polyester-coated wood.

Below are answers to a number of common questions about our TZ/TZe label range.

Can I wipe Brother labels clean?

Yes. That's why you'll find the Brother TZ/TZe range in delis, butchers, and even hospitals.

Can these labels cope with extreme temperatures?

Yes. They've been designed to withstand temperatures as high as 150°C and as low as -80°C. This means you can safely use labels on containers or cups, as well as in your dishwasher and even your oven. At the other extreme, the tape is tough enough to label containers in your freezer (which usually only reaches -17°C).

Will these labels fade, curl or peel off?

No. They've been designed to maintain their condition under various circumstances. You'll get more wear and tear out of a Brother label.

Can these labels be used outside?

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Definitely. These labels can withstand exposure to wind, rain and sun. This makes them perfect for tasks such as identifying plants in the garden or labelling your letterbox.

Will these labels cope with exposure to chemicals?

Yes. Our labels are chemical resistant and won’t fall apart or fade if you do spill liquid on them. They’ll easily handle tasks such as labelling recycled chemical bottles in the garden shed.

We’re known for high-quality robust products and leading technology. But what sets us apart from our competitors is the great 'Brother experience.' We don’t abandon you when you walk out the door. Think about how Brother compares with other leading brand on key features of our commitment to giving you great service:

- New Zealand Helpdesk
- 7-day a week support
- 4-year onsite warranty commitment.
