R4,164

- 930 per roll
- 12 rolls per box

Direct thermal - does not require a ribbon. Instead, a chemically coated heatsensitive material produces images as heat is applied to the surface. It is ideal for indoor applications where temperatures will not exceed high levels and in environments that are not exposed to sunlight for prolonged periods of time.

- Indoor use only
- Very short lifespan
- Simple for operator (one supply item only)
- Standard images/bar codes

Zebra's direct thermal labels are available in paper or synthetic formats. Paper offers an inexpensive way to print in a variety of general-purpose applications, while synthetic offers more durable, long-lasting results with resistance to abrasion, moisture, and chemicals.
