

Equip Cat.6A S/FTP Patch Cable, Grey, 35m

Model: 606714

Manufacturer: EQUIP

EAN: 4015867244463

Product Code: 1674267

R1,558

The equip® 606714 Cat.6A S/FTP Patch Cable is designed to provide stable high-speed Ethernet connectivity for professional and residential network environments.

This patch cable supports bandwidths up to 500MHz and data transmission speeds of up to 10Gbps, making it suitable for short-distance, high-density installations such as patch panels, switches, servers, and network cabinets. It is compatible with PoE and PoE+ applications, allowing simultaneous data and power delivery.

Built with stranded bare copper conductors and an S/FTP structure, the cable uses foil and braided shielding with PIMF (pairs in metal foil) to minimize EMI and crosstalk. The LSZH/LSOH jacket improves safety by reducing smoke and toxic emissions, while molded boots with strain relief enhance durability. The cable complies with ISO/IEC 11801, EN 50173, and RoHS standards for reliable and compliant network deployment.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
