Control Box Button Panel PXN CB1

The PXN CB1 Button Panel is a practical addition to your simulation gaming kit, allowing for an even more realistic representation of driving a truck or rally car. The device works with many popular titles such as Euro Truck Simulator 2, American Truck Simulator and Dirt Rally 2.0, giving the player more control over the vehicle and making it easier to operate additional functions. In addition, the PXN CB1 supports RGB backlighting with the ability to change colors and lighting effects. This not only makes the panel easier to operate in the dark, but also allows you to create your own atmosphere while playing.

30 programmable buttons

The PXN CB1 is equipped with 30 buttons that can be freely assigned to different functions in the game. This makes it possible to control the turn signals, windshield wipers, cruise control or horn in a manner similar to real driving conditions. This solution makes the gameplay more natural and intuitive.

Various types of switches

The panel offers several types of switches - from classic buttons to metal levers to rotary dials. There is also a special engine start button and a lever with a cover, which introduce additional realism when starting the vehicle. Components made of metal provide good conductivity and wear resistance.

Refined design

The housing is made of industrial ABS plastic, which is characterized by high resistance to wear, low temperatures and mechanical damage. In addition, the material is durable and recyclable. On the back of the case there is a power switch and a USB-C port for connecting the device. Thanks to the simple Plug & Play solution, the panel is ready for use immediately after installation, without complicated configuration.

Flexible mounting options

The PXN CB1 panel can be easily mounted on a desk using the included clamps - it supports tabletops up to 70 mm thick. This convenient solution ensures stability even during intense gaming. In addition to desktop mounting, the CB1 also offers the option of mounting on special stands or brackets compatible with the mounting holes. This allows each gamer to adjust the position of the panel to his/her stand, increasing comfort and ergonomics.

Included

- CB1 panel
- USB to USB-C cable
- USB-C to USB-C cable
- clamp
