BlitzWolf BW-AG1 Pro AI Smart Glasses with Interchangeable Sunglass Lenses

The BlitzWolf BW-AG1 Pro AI Smart Glasses with interchangeable sunglass lenses combine 4K video recording, environmental monitoring, and AI support with the comfort of everyday use. The glasses are equipped with an 8 MP Sony camera capable of UHD recording and image stabilization, as well as fast data transfer via Wi-Fi and Bluetooth 5.3 connectivity. Additionally, they offer interchangeable lenses with a blue light filter, allowing you to adapt them to various conditions and needs.

4K Camera and Fast Image Capture

The BW-AG1 Pro model is equipped with an 8 MP Sony camera that enables 4K video recording and detailed photography. Thanks to EIS image stabilization, recordings remain smooth even while moving, which is useful, for example, while cycling or walking. Quick recording startup in about 0.8 seconds lets you capture the moment without unnecessary delay. Additionally, the smart flash improves image quality in low light, reducing noise and enhancing detail clarity.

AI Features and Smart Assistant

The glasses use artificial intelligence to recognize objects in real time, which can be helpful in everyday situations. The built-in AI translator enables conversations in various languages and translates text directly on your smartphone. The "HeyCyan" voice assistant responds to commands and lets you quickly get information, such as the weather or directions. Responses are delivered directly through the glasses, reducing the need to use your phone.

Hi-Fi sound and clear calls

The audio system is designed for everyday use and delivers balanced, clear sound. A dual microphone with noise cancellation effectively separates the user’s voice from ambient noise, improving the quality of phone calls. Beamforming technology precisely detects the sound source, making communication more natural. Connection to devices is via Bluetooth 5.3, ensuring stability and low latency.

Fast data transfer and stable connectivity

The glasses support Wi-Fi, which allows photos and videos to be transferred up to 10 times faster than via Bluetooth. This lets the user quickly transfer content to their phone without unnecessary waiting. The combination of Wi-Fi 4 and Bluetooth 5.3 allows for flexible use of various features depending on needs. Additionally, the cooling design prevents the device from overheating during intensive use.

Interchangeable lenses and eye protection

The BW-AG1 Pro offers easy lens replacement, allowing you to adapt the glasses to different conditions. The set includes sunglasses as well as variants with a blue light filter. This allows you to use a single pair of glasses both outdoors and while working at a computer. The glasses also provide UV protection and the option to use prescription lenses.

Lightweight construction and comfort

The frames, made of TR material, are flexible and damage-resistant, increasing their durability in everyday use. Weighing only about 35 grams, the glasses remain comfortable even during extended wear. The minimalist design ensures the technology remains virtually invisible. As a result, this model performs well during both active pursuits and everyday situations.

Long battery life and convenient charging

The glasses offer extended battery life, allowing you to use recording, music, and call features for hours on end. The magnetic charging system makes connecting the device easy and reduces setup time. This means the user doesn’t have to frequently interrupt their use of the glasses to charge them. In practice, this translates to greater convenience and uninterrupted use throughout the day.

Included

- Smart glasses
- Replacement lenses (a pair of interchangeable lenses with a blue light filter as a gift)
- Charging cable
- Storage case
- Cleaning cloth
- User manual

Manufacturer	BlitzWolf
