Connect two HDMI sources simultaneously to the AC7610 Dual HDMI USB-C Video Switcher, such as a laptop, camera, or game console, with a maximum resolution of 4K@60Hz. Use the illuminated buttons on the AC7610 to switch between the two inputs. Ideal for live streaming events and presentations.

Capture

Capture video at 1080p@60Hz. Whether you're capturing a live event, live stream, webinar or gameplay, the USB-C Video Switcher ensures that every detail is captured.

Record

Save your video directly to your computer. The AC7610 lets you create a high-quality archive of your footage, ready for editing or future viewing.

Stream

Broadcast your content live on platforms such as YouTube and Twitch. The AC7610 ensures a smooth streaming experience so you can share your content with the world without a hitch.

Monitor

Connect an external HDMI screen to enjoy real-time monitoring of your content with minimal latency. The AC7610 provides a smooth viewing experience, making it perfect for live production and instant content review. The HDMI output supports 1080p@60Hz pass-through for viewing content on an external HDMI display.

Picture modes

Enhance your live streaming events and video productions with built-in picture modes: Picture in Picture (PiP) and split screen functionality.

- Picture in Picture (PiP): This mode allows you to place a small overlay from a second source. The buttons on the AC7610 allow you to select the position of the overlay.
- Split screen Top/Bottom (Up/Down): The screen is divided into two equal horizontal (landscape)

sections.

- Split screen Left/Right (Side by Side): The screen is divided into two equal vertical (portrait) parts.

Plug and play convenience

Designed for ease of use, the AC7610 is instantly compatible with both Windows and MacOS computers and requires no additional drivers to operate. Its plug-and-play functionality means you can focus on creating and sharing your content without worrying about technical setup.

Versatile connectivity

- HDMI in 2x: Connect two source devices such as a (DSLR) camera, laptop or game console.
- HDMI out/pass-through: Connect an external display.
- USB-C/USB-A: Connect the video switcher to your computer using the included cable.
- 3.5mm line-in jack: Connect an audio source, such as an audio mixer or soundboard.
- 3.5mm microphone jack: Connect a microphone to the 3.5mm microphone jack.
- 3.5mm line out jack: Connect headphones or speakers.

Business use

- Meeting room: let two people share their laptop screen and switch between these screens.
- Online meetings: stream from a meeting room.
- Webinars: Switch between camera angles or presentation/slide show.
- Demos and workshops: Record or stream your demo or workshop and switch between wide shots and close-ups to keep it dynamic.
- Video production: Capture and record video from your camera. Perfect for conducting video interviews with split screen.

Educational use

Online classes and lectures: Stream live classes or lectures and record them for later viewing. Use PiP mode to show the presentation and the teacher in one shot.

Video tutorials: Record instructional videos to demonstrate procedures or techniques. Switch between wide shots and close-ups.
