USB Type-C® cable: one cable for data, power and video

Use the USB Type-C® cable for seamless data transfer between USB-C devices, like computers, smartphones and tablets. The USB Type-C® 3.0 cable has a maximum data transfer speed of 10Gbps.

Furthermore, the cable can be used to charge your devices with maximum 60W when connected to a USB charger.

This cable supports DisplayPort Alternate Mode with a maximum video resolution of 4K @60Hz.

Advantages of an angled USB Type-C® cable

The USB Type-C® cable features a 90° left/right angled connector on one end and a 90° up/down angled connector on the other end. In combination with the reversible USB Type-C® connector, the benefits of angled USB Type-C® cables are noticeable in many situations.

This design enables convenient device connections in tight spaces and hard-to-reach areas. For devices that are often moved while plugged in, it minimizes the risk of accidental damage to the port or cable. The angled connector reduces strain on the cable, enhancing its durability and extending its lifespan. Additionally, angled cables contribute to a cleaner, more organized setup.
