R1,435

The ACT AC8055 dimmable monitor LED light bar is designed to provide optimal illumination for your monitor and workspace, improving your productivity and comfort. Perfect for working in low-light environments. This compact and USB-powered light bar offers four color temperature settings: warm white (3000K), cool white (4000K), daylight (5000K), and cool daylight (6500K). Together with the customizable brightness, your lighting experience can be personalized. The memory function saves your preferred settings, allowing you to easily resume your last configuration.

Illuminate your workspace

Spend long hours in front of your monitor in a low-light setting? The AC8055 LED light bar is the perfect solution. The monitor LED light bar has a stylish and compact design. The asymmetrical

glare-free design prevents light reflection on your screen, ensuring a better viewing experience.

Adjustable color and brightness via touch control

The touch buttons on the top of the bar let you easily control brightness and color temperature. The light bar offers four color temperature levels: warm white (3000K), cool white (4000K), daylight (5000K) and cool daylight (6500K). Tap and hold to adjust the brightness gradually for a personalized setup.

Auto-brightness mode

The LED light bar features an automatic brightness mode that adjusts lighting based on your surroundings. This feature can be turned off if you prefer manual control.

Memory function

The memory function saves your preferred settings, so when you turn the light back on, it resumes your last configuration. You don't need to adjust the settings.

Clamp design

The AC8055 is easy to install by its clamp design, which is suitable for monitors up to 7cm thick and comes with non-slip protective pads.

USB powered

Power the AC8055 LED light bar with the included 180cm USB cable, for both USB Type-A and USB Type-C devices such as a laptop or USB charger.
