ACT Gigabit PoE+ (30W) Injector

Model: AC4438

Manufacturer: ACT

EAN: 8716065409277

Product Code: 1676754

R1,311

Power your network equipment such as: an access point or VOIP telephone via a single network cable with the AC4438 Gigabit PoE+ Injector. This PoE+ injector is a perfect solution when installing a network device at a location where there is no power socket available. Or whether you want to connect an active PoE+ device which cannot be powered by an power supply. The PoE+ injector automatically determines the correct power. It complies with the 802.3af/at PoE+ standard (max. 30W) and is therefore suitable for all hardware that supports this standard. Besides, the AC4438 has a Gigabit ethernet connection to ensure fast data transfer. The AC4438 is equipped with an integrated wall mount.
