R1,291

Prevent mouse-related strain injuries with the ACT AC5155 Wireless Ergonomic Mouse. Connect this mouse to three different devices simultaneously via Bluetooth (2x) and the USB-C/USB-A combo receiver (1x). The receiver can be stored inside the mouse. Choose your preferred accuracy with the DPI switch: 1000/1600/2400. Accessible thumb buttons ensure fast navigation through web pages. Additionally, the mouse has an intelligent power-saving function and an on/off switch.

Control three devices with one mouse, easily switch between the devices

The AC5155 Ergonomic Multi-Connect Wireless Mouse can be used on three different devices, including computers, laptops and tablets. Connect the mouse to two devices via Bluetooth or to a computer or laptop via the included 2-in-1 receiver. Switch between the devices using the dedicated button on the side of the mouse. The LED on the mouse shows which device is active.

Prevent mouse-related strain injuries

Use the AC5155 Ergonomic Mouse to help prevent mouse-related strain injuries. This ergonomic mouse is designed to fit your hand comfortably and maintain a natural hand and arm position.

2-in-1 receiver

Would you like to connect the wireless mouse to a computer/laptop with a USB-C or USB-A port? The AC5155 has a special USB dongle. Despite its compact design, the dongle has both a USB-C and USB-A connector and can be stored in the mouse’s battery compartment.

Connect via Bluetooth: use the mouse without a dongle

Want to use the mouse but forgot the USB dongle? Don’t stress out! Simply connect the mouse to your device via Bluetooth. Pair the AC5155 with two different Bluetooth devices.

DPI switch: 1000/1600/2400

Select your preferred level of accuracy and precision with ease using the DPI switch. Choose between the DPI levels: 1000/1600/2400 and select your preferred level.

For professional and home use

The AC5155 has a comfortable grip. Use the solid scroll wheel and the accessible side buttons to navigate through applications and pages.

Low battery power saving

The Ergonomic Wireless Mouse has an intelligent power-saving feature. The mouse enters a sleep mode when it hasn’t been used for a while. The mouse also has a physical on/off switch so you can
