

Mikrotik XQ+DA0003 InfiniBand cable 3 m QSFP+ to QSFP+ QSFP28 to QSFP28 Black

Model: XQ+DA0003

Manufacturer: MIKROTIK

EAN: 9120117653614

Product Code: 1678012

R1,683

The **XQ+DA0003** is a high-performance cable designed by **MikroTik**, a renowned manufacturer in the networking industry. This product is specifically engineered to meet the demands of modern data centers and high-speed networking applications. With a length of **3 meters**, it provides ample reach for connecting devices without compromising on performance.

This cable features dual **QSFP+ to QSFP+ / QSFP28 to QSFP28** connectors, ensuring compatibility with a wide range of networking equipment. The male-to-male connector configuration allows for seamless integration into existing setups, making it an ideal choice for network administrators looking to enhance their infrastructure.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Engineered for optimal data transmission, the **XQ+DA0003** supports high bandwidth applications, ensuring minimal latency and maximum throughput. This makes it suitable for various applications, including data center interconnects, high-performance computing, and enterprise networking. The robust design of this cable guarantees durability and reliability in demanding environments.

In summary, the **XQ+DA0003** by **MikroTik** is a versatile and efficient solution for high-speed networking needs. With its technical specifications and quality construction, this cable stands out in the market, making it a valuable addition to any professional networking setup. Trust in MikroTik's expertise to deliver performance and reliability with this exceptional product.
