R3,327

Swap. Shine. Keep Playing.

The HyperX Cloud Flight 2 lights up every match with full-panel RGB paired with magnetic ear-cup plates you can pop off and swap in seconds — no tools, no downtime. Change the look, save one lighting profile onboard, and match your headset to your playstyle, rank, or stream setup. Designed for endurance, turn the lighting off to conserve battery and keep going with up to 100 hours[2] of 2.4 GHz gameplay or 150 hours[2] via Bluetooth[3]. Instant Pair[4] support lets you connect to select OMEN laptops without a dongle, while a simple switch toggles between 2.4 GHz wireless and Bluetooth modes. Stay comfortable through every round with plush memory foam ear cushions, 90° rotating earcups, and steel sliders built to withstand daily wear. The angled 50 mm drivers deliver immersive, game-optimized sound. Use the detachable 10mm boom mic for clear communications or go boomless with the built-in mic when you’re off duty. Onboard controls for audio, microphone, media, and lighting put you in control with convenience — no menus, no distractions. Whether you're gaming, streaming music or videos, browsing Twitch, or completing assignments, the HyperX Cloud Flight 2 keeps you comfortable and stylish with all-day comfort and customizable RGB.
