GDX 18V-210 C Professional: Further information

Product Highlights

Built for strength, the powerful GDX 18V-210 C Professional impact driver delivers a high level of flexibility and damage prevention. Two default modes available on the user interface, selftapping screw (A) and wood screw (B), prevent broken or stripped off screwheads, worn-out threads, and damaged workpieces by slowing down or shutting off the impact driver. All modes are customisable via the Bosch Toolbox App. The 2-in-1 tool holder facilitates quick and flexible changeover between 1/4" internal hex and 1/2" square drive tools. Power is adjustable via three speed/torque settings, offering advanced flexibility and control.

Equipment & Application

This impact driver can be used in many applications, such as driving in selftapping or wood screws, or for tightening and removing metal bolts and nuts (M 6 - M 16). It is compatible with all Bosch Professional 18 V batteries and chargers (Professional 18V System).

Additional Information

The GDX 18V-210 C Professional is equipped with a status indicator, belt clip, and LED light for
