Yeelight Screen Light Bar Pro Libra 2 monitor lamp

Yeelight Screen Light Bar Pro Libra 2 is a modern monitor lamp that improves the comfort of work and entertainment at the computer. It offers adjustable brightness up to 350 lm and the ability to adjust the color temperature in the range of 2700–6000 K. This allows you to easily adjust the lighting to different tasks and times of day! The thoughtful design eliminates screen reflections, and the additional RGB backlighting creates a pleasant atmosphere when watching movies or playing games. You can also synchronize the light with games, movies, or music. The lamp is compatible with the Matter standard and is easy to operate with the included remote control knob.

Comfort for your eyes and true-to-life color reproduction

The lamp is designed to reduce eye strain during long periods of computer use. The light falls on the desk at a 45° angle, illuminating the keyboard and workspace while eliminating glare on the monitor. This keeps the image clear and reduces eye strain, even during long hours of work or study. What's more, the light generated by the lamp does not dazzle or flicker. You also don't have to worry about harmful blue light. In addition, Yeelight Libra 2 provides very good color rendering thanks to a CRI of Ra95. Illuminated objects retain their natural colors and clear details, which is especially important when working with graphics, photos, or video materials.

Smooth adjustment, RGB backlighting, and synchronization with your screen or music

The lamp allows you to precisely adjust the lighting to your current needs. Smooth color temperature adjustment in the range from 2700 K to 6000 K allows you to create the right conditions for both evening relaxation and work requiring concentration. You can also adjust the brightness to the conditions in the room at any time. In addition, there is a memory function that allows the device to restore the last settings when it is turned on again. You don't have to adjust everything from scratch every time! But that's not all – the back of the lamp is equipped with RGB ambient lighting, which creates an atmospheric background behind the monitor. You can also synchronize the device with the image on the screen or music so that the light reacts to the game, movie, or songs being played. It's a great way to create a unique atmosphere!

Convenient control – wireless knob and Matter compatibility

The lamp is operated using a wireless control knob that allows you to quickly turn the light on and off, choose from available modes (Office, Relax, Custom), adjust the color temperature, and set the brightness. Everything you need is at your fingertips! In addition, the device is compatible with the Matter standard, so it can work with popular smart home systems such as Apple Home, Google Home, Amazon Alexa, and SmartThings. Control your lighting with an app or voice commands, create automations, and much more!

Stable mounting on various monitors

A specially designed mount allows the lamp to be securely attached to various types of monitors – from thin (minimum 10 mm) to thick (up to 50 mm) to curved (R1000-R1800). The 25° tilt
