Power station Allpowers S2000 Pro

Model: S2000

Manufacturer: ALLPOWERS

EAN: 6975274260174

Product Code: 1681318

R15,120

Allpowers S2000 Pro Power Station

The Allpowers S2000 Pro is a portable power station with a capacity of 1,451 Wh, an output power of 2,400 W, and a peak power of up to 4,000 W. It provides power for electronics, home appliances, and high-power devices, making it ideal as an emergency power source at home, on a property, in an RV, or while camping. The power station supports charging from the mains up to 1,500 W, from solar panels up to 1,000 W, and from a 12/24 V car battery system, as well as simultaneous use of mains and solar power. It also offers a UPS function, app-based control, a pure sine wave inverter, and a set of connectors that allows you to power up to 12 devices simultaneously.

2,400 W of power to run various devices

The 2,400 W continuous power output allows you to use not only smartphones, laptops, routers, and lighting, but also more power-hungry devices such as a refrigerator, microwave, coffee maker, electric kettle, hair dryer, or power tools. A peak power of up to 4,000 W provides an additional

reserve when starting up equipment that requires higher power consumption. The use of a pure sine wave inverter also allows for the safe powering of sensitive electronics.

1,451 Wh capacity – energy reserves that last longer

Thanks to its large battery capacity, the S2000 Pro can serve as a backup power source at home or as an independent power supply in areas without access to the power grid. Depending on power consumption, the station can power a refrigerator, home appliances, or lighting for many hours, as well as recharge laptops, tablets, and smartphones multiple times. This makes it useful both during power outages and during extended stays away from home.

Several Ways to Charge Quickly

The Allpowers S2000 Pro can be charged from a standard electrical outlet, a car’s power system, or using compatible solar panels. The AC input with a power rating of up to 1,500 W allows you to quickly recharge before a trip or your next use, while solar charging support lets you use a renewable energy source while out in the field. The 12/24 V car power supply, in turn, is a practical solution for longer trips.

Power up to 12 devices simultaneously

An extensive set of ports reduces the need for additional power strips and chargers. The station is equipped with AC outlets, USB-A ports, two USB-C ports with up to 100 W of power, a 13 V/10 A car power output, and a connector designed for RV use. This allows you to simultaneously power home appliances, mobile electronics, and other devices, while the fast USB-C port can be used, among other things, to charge compatible laptops.

Manufacturer	Allpowers
Model	S2000 Pro
Battery capacity	1451 Wh
AC output power	2400 W

Peak Power	up to 4,000 W
AC Waveform Type	pure sine wave
Maximum AC Input Power	1,500 W
Maximum Solar Input Power	up to 1,000 W
Car Charging	12/24 V
USB-A ports	4
USB-C ports	2 × up to 100 W
Car output	13 V / 10 A
Number of devices supported simultaneously	up to 12
UPS function	yes
App control	yes
Dimensions	approximately 37.5 × 24.5 × 25 cm
Weight	approximately 13 kg
