

Moza Racing MTLP Panel

Model: AS009

Manufacturer: MOZA RACING

EAN: 6973137270766

Product Code: 1682947

R3,755

Realistic Aircraft Controls

Designed after the landing panel of an F/A-18, the MOZA MTLP features an intuitive switch layout that allows pilots to operate controls by touch, minimizing the need for visual confirmation. This maximizes accuracy and efficiency when managing landing gear and flight functions.

Authentic Parking Brake Mechanism

MOZA sets a new industry standard with a parking brake lever that replicates the rebound and rotational movement of real fighter jet controls, delivering an unparalleled level of realism.

Programmable Panel Lights

From landing gear indicators to ambient lighting, it dynamically mirrors in-game telemetry for maximum immersion.

Extensive Control Options

With 25 programmable switch signals, the MTLP provides comprehensive control for critical aircraft functions, ensuring a fully interactive flight experience.

Precision Engineering with Hall Sensors

High-accuracy Hall effect sensors in the landing gear and tailhook hook lever deliver smooth, precise input with long-lasting durability.

Built to Last

Crafted from high-strength aluminum alloy, key components like the landing gear, brake lever, and tailhook lever hook are designed for superior durability and reliability.

Modular Compatibility

Seamlessly integrates with the MOZA MTP Throttle Panel, creating a complete, immersive fighter jet control system for takeoff, combat, and landing.

Advanced Software Customization

MOZA Cockpit software enables telemetry-driven lighting effects and extensive customization, allowing pilots to fine-tune their setup for the ultimate flight experience.
