... My LED. It indicates that the case is powered up and has access to the HDD. This way you can see at first glance whether you are connected to your data or not.

No speed limit

The fast USB 3.0 port with UASP support allows data transfer rates of up to 5 Gbit/s and ensures that even large amounts of data can be transferred quickly and without problems. The enclosure supports SATA I/II/III up to 6 Gbit/s and can therefore fully use the USB 3.0 standard.
