NEEWER ST49 Gimbal Sling for DJI RS2/RSC2/RS

The NEEWER ST49 is an ergonomic sling designed for DJI Ronin gimbals, which enhances comfort while filming and makes it easier to capture stable shots from a low angle. The design is optimized for use with popular DJI RS and RSC series stabilizers, ensuring more comfortable handling of the setup and reduced hand fatigue during long shoots. The compact design and contoured grip make the accessory fit comfortably in your hand and allow for greater control over the gimbal while moving.

Quick assembly and secure mounting

The grip uses a NATO quick-release mount, allowing for instant assembly and disassembly without the need for additional tools. The design supports a load of up to 6 kg, making it suitable for more complex equipment setups as well. Additional security in the form of a locking knob and a spring-loaded pin minimizes the risk of accidental loosening and increases safety during operation.

Angle adjustment and more comfortable gimbal operation

The ball joint allows you to adjust the mount’s position within a 180° range, making it easier to adapt the setup to different types of shots and filming styles. This makes it more comfortable to shoot from a low angle or provides greater freedom during dynamic camera movements. The foldable design also makes it easier to transport and store the mount when not in use.

Comfortable grip and additional expansion options

The grip surface is coated with non-slip silicone, which improves grip security and increases comfort even during hours-long shoots. The ST49 model also offers numerous mounting points, including 1/4" and 3/8" threads, holes compatible with ARRI pins, and two cold shoe mounts. This allows you to conveniently expand your setup with additional accessories, such as a viewfinder, LED light, or audio receiver.
