SwitchBot Ultra 3-in-1 smart lock with Hub Mini Matter control panel and Keypad keypad

SwitchBot Lock Ultra Touch Combo is an advanced smart lock designed for modern homes and apartments. With Matter protocol support, it works with the most popular ecosystems - Apple Home, Google Home, Alexa, Home Assistant and others. The lock works with most European door types, allowing easy installation without replacing the entire mechanism. It's a great choice for people who want to increase the security, comfort and automation of their home.

Instant unlocking

The SwitchBot Lock Ultra responds in just 0.3 seconds. You can open the door with a touch of your finger, automatically when you approach your home, with a password, NFC card or voice command. The system recognizes up to 100 fingerprints and uses anti-spoofing technology to provide the highest level of security. Combined with the SwitchBot Mini Hub, you get up to 17 methods of unlocking - from your smartphone to your watch.

Quiet operation at night

The device automatically switches to silent mode after dark, limiting sounds to less than 20 dB so as not to disturb your household. You can come home at any time without the risk of waking your family or neighbors.

Design for European doors

The SwitchBot Lock Ultra Touch Combo supports partial and full locking modes for fast opening during the day and maximum security at night. With a set of accessories, it fits various types of locks such as Euro Profile Cylinder, Knob Cylinder, Mortise, Night-Latch, Jimmy Proof and others.

Triple power source

The lock uses a triple power system (Triple Power Backup) - a main battery, a backup battery and an emergency supercapacitor. This provides up to 9 months of operation and the ability to unlock the door if the main cell is discharged. The device remains fully functional even at -40°C, thanks to its frost-resistant CR123A battery.

Always in control

With the SwitchBot app, you can check in real time whether the door is closed, open or unlatched. You'll also get low-battery notifications and a detailed event log for more control over your home security.

Stylish and functional finish
