SwitchBot Lock Ultra 3-in-1 with Mini Matter Hub and Vision Keypad

The SwitchBot Lock Ultra 3-in-1 is an advanced smart lock that takes door automation to the next level. It comes with a SwitchBot Hub Mini with Matter support and a Vision keypad with facial recognition for full integration with Apple Home, Google Home, Alexa or Home Assistant ecosystems. With a modern design and easy installation, the device fits most European locks, allowing you to enjoy convenience and security without replacing the door or cylinder.

Open with your face, touch or automatically

The new SwitchBot Vision keypad recognizes the user's face using 3D Structured Light technology, so you can unlock the door without keys, codes or fingerprints. The lock works even in low-light conditions and recognizes the user from up to 90 cm away. In combination with the Lock Ultra, you can also use auto unlock via Bluetooth or GPS, fingerprint reader, NFC cards, watch, password or voice command - up to 17 access methods in total.

Privacy and data security

The Vision system uses local image processing - biometric data never goes to the cloud, guaranteeing complete privacy. The lock protects against fraud attempts, including photos or videos, and a 6-layer security system and two-step authentication enhance the protection of your home.

Triple Power Protection

With Triple Power Protection, the lock can operate for up to 12 months on a single charge of the main battery. A built-in backup battery and emergency capacitor provide access to the door in the event of a discharge, and resistance to -40°C allows you to use the device in any conditions. An LED light, in-app notifications and audible alerts will inform you of the battery status.

Quick installation without drilling

The Drill-Free design makes installation of the SwitchBot Lock Ultra take just a few minutes and requires no interference with the door. The magnetic mount makes removal easy, and with the included wood-textured stickers, you can match the lock's appearance to your interior style. The lock works with most types of European locks, including Euro Profile Cylinder, Mortise, Knob Cylinder, Jimmy Proof or Night-Latch.

Quiet and elegant operation

The Lock Ultra automatically switches to Silent Mode after dark, reducing the operating sound below 20 dB. Its aluminum housing, just 42 mm thick, gives it a modern, unobtrusive look that blends seamlessly with any door style - from modern to classic.

Always under your control

With the SwitchBot app, you can remotely check the status of the door - open, closed or ajar - and view the event history. The lock works with the SwitchBot Hub Mini Matter panel, so you can also control it by voice or remotely, wherever you are.
