

be quiet! LIGHT LOOP 360mm White Processor All-in-one liquid cooler 12 cm 1 pc(s)

Model: BW023

Manufacturer: BE QUIET!

EAN: 4260052191156

Product Code: 1684295

R3,396

Peak performance and lighting

Light Loop 360mm White is an extremely high-performing All-in-One water cooling unit with uniquely illuminated ARGB cooling block for users with heavily overclocked systems.

TRUE COLORS

Unrivalled ARGB lighting

Light Loop 360mm White features 64 LEDs in total, leading to stunning visuals. Since your PC is not like any other, you can individualize your build with numerous colors and illumination options. The uniquely illuminated cooling block and Light Wings LX fans make Light Loop 360mm White an

undisputed highlight in any system.

LIGHT WINGS LX FANS

Performant, yet quiet operation

Light Loop 360mm White features 3 Light Wings LX 120mm PWM high-speed fans. They come with 16 LEDs that perfectly scatter across the fan blades and are key for the stunning visuals Light Loop 360mm White offers. The fan’s 9 airflow-optimized fan blades not only reduce noise-generating turbulences but also ensure that Light Wings LX 120mm PWM high-speed provides the performance that is needed, even in demanding scenarios.

EXTREMELY HIGH COOLING PERFORMANCE

Designed for intensive gaming sessions

With Light Loop 360mm White even the most demanding applications can be used reliably. An immense cooling power provides low temperatures even during periods of peak CPU performance. Perfectly suited for your next session!

ADVANCED TECHNOLOGIES

One step ahead in every aspect

Jet plate, pump and the cold plate of Light Loop 360mm White are designed for peak performance. The metal jet plate increases flow speed of the cooling liquid, leading to an enhanced performance. A cold plate with a high-density fin stack increases cooling performance on modern flagship and high-end CPUs. Finally, a progressive IC in the motor reduces switching noise, ensuring the noise of the pump stays at a low level.

ONE HUB, MANY POSSIBILITIES

Synchronization of up to 6 ARGB-components

The ARGB-PWM-Hub enables synchronization of up to 6 PWM fans and 6 ARGB components. This allows you to control all your cooling and lighting gear with just one PWM and one ARGB header on your motherboard. It can be positioned anywhere inside the case with adhesive tape or screw holes that match a 2.5” SSD mounting.

EASY TO REFILL

For a long lifespan

The refill port is easy to access which makes refilling safe and comfortable. The coolant bottle included in scope of delivery makes it easy to achieve a long lifespan.

WHITE AS SNOW

Stunning design

Light Loop 360mm White complements all-white systems best, thanks to its uniform white aesthetics. The integrated ARGB LED lighting within the cooling block and fans allows the vibrant lighting to take center stage.
