DDPAI MINI Pro 4K Dash Cam

The DDPAI MINI Pro 4K is a compact dash cam that records video at a native resolution of 3840 × 2160 pixels. The device is designed for discreet mounting on the windshield without obstructing the driver’s field of view. It uses a dual-band Wi-Fi module supporting 2.4 GHz and 5 GHz frequencies to connect to a smartphone. Power is supplied via a modern USB-C port with input specifications of 5V 2A, and support for Micro-SD cards with capacities up to 256 GB allows for the storage of recorded footage.

Detailed 4K UHD Video

The DDPAI MINI Pro 4K dashcam offers 4K UHD video recording, which translates to a resolution of 3840 × 2160 pixels. Such a high pixel count ensures high detail in the recorded footage while driving. The increased sharpness of the footage allows for easy identification of key road details. Every incident on the road is captured in a clear digital format.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Discreet housing without a built-in screen

The dashcam’s design is characterized by the absence of a traditional LCD display. The compact housing is designed for installation directly behind the vehicle’s rearview mirror. This location ensures that the device remains invisible from the driver’s perspective and does not obstruct the windshield. This solution helps maintain full visibility and the aesthetic appeal of the car’s interior.

Full Control via the DDPAI App

The dashcam is managed through the dedicated DDPAI App. The app is available for download on Google Play and the App Store, providing support for both Android and iOS. With it, users can easily view real-time camera footage. The app also allows users to adjust the dashcam’s operating settings and archive recordings.

Universal Power Supply via USB-C Connector

A symmetrical USB Type-C connector is used for both power delivery and data transmission. The dashcam’s rated input parameters are 5V voltage and 2A current. The package includes a dedicated USB car charger and a power cable designed for in-vehicle installation. The included tool makes it easy to route the cable neatly under the upholstery.

Included in the set

- DDPAI MINI Pro 4K dashcam
- USB car charger
- Power cable
- Electrostatic sticker and 3M adhesive tape for the mount
- Tool for prying and routing cables
- User manual
