DDPAI N4T Pro Wi-Fi 4K + 1080p + 1080p Dash Cam

The DDPAI N4T Pro is an advanced dashcam offering a 3-channel vehicle monitoring system. The device allows for simultaneous recording of the front view in ultra-high resolution (3840 x 2160 (4K UHD), from inside the cabin at 1080p, and from the rear of the vehicle at 1080p. The device features a built-in preview screen, a multi-system GNSS positioning module, and wireless Wi-Fi and Bluetooth connectivity. The black housing weighs 206 g and is mounted using a dedicated mount with 3M tape. The entire system is designed to comprehensively secure evidence during everyday driving.

Three-Channel Video Recording System

The N4T Pro model features a configuration comprising a front camera, an interior camera facing the cabin, and a rear camera. The device allows for simultaneous recording from three perspectives: a

front view in 4K UHD, as well as the interior of the cab and the area behind the vehicle in 1080p resolution. Depending on the user’s needs, the recorder also supports Dual Channel mode, which focuses on monitoring the front and rear of the vehicle. Interior recording allows for documenting events inside the passenger cabin, which is essential when transporting passengers. This channel division ensures full surveillance of the vehicle’s immediate surroundings.

Detailed Recordings in 4K UHD Resolution

The dashcam’s front camera records video at a native resolution of 3840 x 2160 pixels. The 4K UHD format guarantees a high level of sharpness, making it easier to read the license plates of passing cars and traffic signs. The higher pixel density allows you to see fine details of the infrastructure even in dynamic traffic conditions. Recordings at this quality provide precise evidence for resolving disputed traffic situations. Each recording maintains the clarity of key elements in the frame, whether the vehicle is stationary or traveling at higher speeds.

Wireless Wi-Fi and Bluetooth BLE 5.4 Connectivity

The DDPAI N4T Pro is integrated with a Wi-Fi module operating in the 2.4 GHz band. Bluetooth 5.4 technology enables quick pairing with a smartphone. Wireless transmission allows for real-time video preview directly on the phone’s screen. Users can download recorded files without having to remove the storage media. The dedicated DDPAI app provides access to camera settings management on both Android and iOS devices.

Included in the set

- Dashcam
- Rear camera
- Rear camera extension cable
- Power cable
- USB car charger
- Removable mounting bracket with 3M adhesive tape
- Electrostatic sticker
- Cable routing tool
- User manual
