Dashcam DDPAI Z60 2026 Dual

Model: Z60 2026 Dual

Manufacturer: DDPAI

EAN: 6934915208081

Product Code: 1685019

R3,327

DDPAI Z60 2026 Dual dash cam

Ensure accurate documentation of every trip with the DDPAI Z60 2026 Dual dash cam, which records footage from two cameras simultaneously. The front camera records in 4K UHD resolution (3840 × 2160) at 30 fps or 2.5K (2560 × 1440) at 60 fps, while the rear camera records in Full HD resolution (1920 × 1080) at 25 fps. Dual HDR technology helps capture detailed images in varying lighting conditions, making it easier to record road situations. The front lens offers a 142° field of view, and the rear lens a 125° field of view, allowing the device to cover a wide area in front of and behind the vehicle. Recordings are saved in MP4 format using H.265 or H.264 encoding.

Smart features to support driving safety

The dashcam is equipped with a three-axis G-sensor that detects G-forces, helping to identify events requiring special attention. The ADAS driver assistance system provides warnings when the vehicle ahead starts moving and when the driver shows signs of fatigue. Voice control allows you to take a photo by saying “Take a photo,” making it easier to operate the device without having to touch it.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The built-in GPS module and support for GNSS systems—including GPS, BDS, GLONASS, GALILEO, and QZSS—enable the recording of location data. This allows you to access route-related information through the DDPAI app.

Wireless connectivity and convenient access to recordings

The DDPAI Z60 2026 Dual supports Wi-Fi 6 Turbo in the 5 GHz band and Bluetooth BLE 5.4, enabling wireless communication with your smartphone. Control via the DDPAI app allows you to conveniently operate the dashcam and access recorded footage. The 3-inch screen with a resolution of 640 × 360 pixels makes the device easy to use, and the built-in microphone and speaker support audio functions. You can use a microSD card with a capacity of up to 512 GB to store recordings, allowing you to collect plenty of footage from your daily drives.

Compact design and reliable power supply

Measuring 83 × 64.7 × 36.5 mm and weighing 192 g, the housing allows for convenient installation of the dashcam in a car. Power is supplied via a USB-C port, and the supercapacitor ensures reliable operation under varying temperature conditions. The device is designed to operate at temperatures ranging from -20°C to 70°C, while during storage it can be exposed to temperatures ranging from -40°C to 85°C. The kit includes power cables, a car charger, mounting hardware, and a cable-hiding tool to facilitate the installation of both cameras.

Included in the set

- Front camera
- Rear camera
- Cable installation tool
- 3.5 m front camera power cable
- 6 m rear camera extension cable
- Car charger
- 3M adhesive tape
- Electrostatic sticker
- Warning sticker
- User manual
