CONTROL PANEL 8-16ZONES/PERFECTA 16 LTE SET-A SATEL

Model: PERFECTA 16 LTE SET-A

Manufacturer: SATEL

EAN: 5905033339163

Product Code: 1685110

R3,901

Includes antenna ANT-LTE-I and case OPU-4P

The PERFECTA family control panels are designed to protect small and medium-sized premises, such as apartments, detached houses, segments of terraced houses, offices, small businesses, etc. They provide protection to the requirements of EN 50131 Grade 2.

The control panel is simple to configure as well as easy and intuitive to operate using keypads, including touchscreen models. Functionalities of the alarm system can also be controlled remotely using the PERFECTA CONTROL mobile application and remote control keyfobs .

The PERFECTA 16 LTE control panel makes it possible to create wired and wireless systems – you can connect to it the PERFECTA-RF, i.e. the MICRA wireless system module (frequency band of 433 MHz). Alternatively, the INT-RX-S keyfob receiver expansion module may be connected to the control panel.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The PERFECTA 16 LTE control panel is equipped with a LTE communication module supporting 2G and 4G networks. This feature enables the use of a mobile application with push notifications support, remote configuration of the system using the PERFECTA Soft program, event reporting (e.g. to a security agency monitoring station), voice telephone messaging, SMS control and audio alarm verification (listening for sounds from the protected premises). The module supports two nano-SIM cards to ensure uninterrupted communication: if transmission over the first operator’s network fails, the second card is automatically selected.
