R7,662

MOVA M50 Ultra Cordless Upright Vacuum with Mopping Function

The MOVA M50 Ultra Cordless Upright Vacuum with Mopping combines 22,000 Pa of suction power with a mopping function to make cleaning faster and more effective. Thanks to EdgeCoverage™ technology, the device thoroughly cleans along edges, and automatic liquid dispensing makes it easy to remove dirt without leaving streaks. The hot-water self-cleaning brush system and quick-dry feature keep the unit clean, while the practical design allows you to easily vacuum under furniture without having to bend over. Additionally, intelligent motion assistance ensures smooth and comfortable maneuvering of the vacuum cleaner regardless of the floor type.

Reaches every corner

EdgeCoverage™ technology, featuring a robotic arm and a retractable scraper, enables thorough cleaning along walls and the edges of furniture; as the robot moves backward, the arm automatically collects residual water and dirt, leaving the floor almost dry immediately after cleaning. Thanks to Lie-Flat Cleaning technology, the device tilts 180°, effortlessly sliding under low furniture and reaching hard-to-reach places. This feature allows it to remove pet hair and dirt even from corners, ensuring clean and dry surfaces throughout your home.

No Hair Tangles

Thanks to its densely spaced comb teeth, the MOVA M50 Ultra effectively captures strands of hair and pet hair, preventing them from getting tangled in the brush. As a result, the roller stays clean throughout the entire cleaning process. Now you can clean efficiently and without unnecessary stress.

Clean Without Bending Over

The MOVA M50 Ultra features a foldable, extendable handle with adjustable height (from 120 to 135 cm), allowing you to comfortably vacuum under beds, sofas, or cabinets without having to bend over. The ergonomic design with the Flex-Master™ Pro system ensures comfort for users of all heights, and the bionic wrist joint reduces strain on the hands, allowing for smooth maneuvering of the vacuum cleaner. In addition, the handle folds at a 90° angle, making it easier to reach low spaces and store the vacuum cleaner. The device weighs 5.7 kg, but the perceived weight is only about 610 g.

Smooth Movement

The intelligent driving assistance system continuously analyzes the type of floor and how the vacuum cleaner is being moved, automatically adjusting resistance and assisting its movement. The assist wheel reduces resistance and actively guides the vacuum cleaner forward and backward, relieving strain on your wrists while cleaning.

No Unpleasant Odors

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The MOVA M50 Ultra vacuum cleaner is equipped with a deodorizing solution that neutralizes odors using natural substances, ensuring up to 7 days of freshness with daily use. This means that even after cleaning up pet hair, spilled coffee, or dirty shoes, the device does not emit unpleasant odors. The system requires minimal maintenance and remains effective for up to 90 days without needing replacement. The solution is based on the controlled release of active ingredients that are environmentally friendly and do not cause irritation.

Hygiene Thanks to Hot Water

The self-cleaning system in the MOVA M50 Ultra uses water at a temperature of 100°C to remove dirt and bacteria from the brush. The Smart Dirt Detection system detects the level of dirt on the brush and initiates cleaning only when necessary, which helps reduce water and energy consumption. There are two drying modes to choose from at 90°C—fast (5 minutes) and quiet (15 to 30 minutes). This ensures the device stays clean and ready to use whenever you need it. The noise generated during drying does not exceed 72 dB.

Control via the App

With the MOVAhome app, you gain full control over the vacuum cleaner right from your phone. You can schedule self-cleaning cycles, monitor filter wear, analyze cleaning times, and set operating modes according to your needs. The app sends maintenance reminders and records data from each cleaning cycle, allowing you to track the vacuum cleaner’s usage in real time. A Multi-Device Management feature is also available, letting you manage multiple devices simultaneously. The device is also equipped with a clear LED (Light Emitting Diode) display, and voice prompts inform you of its operating status and remind you of necessary actions during cleaning.

Refined Design

A high-capacity 4000 mAh battery provides up to 40 minutes of runtime, allowing you to conveniently clean your home. The device charges in about 4 hours. There are 3 operating modes available—Smart, Solution, and Suction—which allow you to tailor your cleaning strategy to your current needs. Spacious tanks (800 ml for clean water and 700 ml for dirty water) allow for convenient cleaning without having to stop to refill or empty them. The system that separates clean water from dirty water minimizes user contact with dirt and makes it easier to maintain hygiene. As
