Professional Sound Quality with Superior Configuration

Transcends ordinary soundbars and Bluetooth speakers available on the market

Tailored acoustic structure

The optimized high-penetration speaker layout delivers crystal clear sound, allowing rich sound details and high-fidelity audio to be experienced from various positions.

Powerful Acoustic

Configuration

Featuring a powerful configuration of 1.1.1 channels and 4 units, as well as speakers made from premium industry materials,the product delivers immersive three-dimensional surround sound and high-fidelity audio with rich details, rivaling the experience of professional cinemas.

Superior height-channel sound

15°

The optimal 15-degree angle for height-channel speakers has been carefully tested to provide exceptional immersion without space reflection

Ultra-high frequency range

20kHz

The high-frequency speaker, crafted from premium industry materials, extends beyond the ultra-high frequency range of 20kHz, delivering a melodious yet not harsh high-pitched sound

Ultra-high sound pressure level of single unit

94dB

The sound pressure level of a single Z100 can reach the ultra-high sound pressure level of an entire sound bar system, delivering a more immersive and powerful sound, enhanced spatial audio transparency, and an expanded sound stage

Low-frequency extension algorithm

Low frequencies are optimized and gained, lowering the extension frequency to deliver more thrilling and powerful bass performance

Single Z100 Delivering a sound effect that transcends ordinary soundbars and Bluetooth speakers available on the market

Ordinary Bluetooth speaker

2.0 channels dual speaker

Single Z100

1.1.1 channels | 4 high-quality speakers

Ordinary soundbar

2.0 channels dual speaker

Independent Subwoofer Z100-SW

The optional independent subwoofer features a deep star gray appearance and utilizes larger ferrite magnets and CONEX elastic wave materials inside, delivering strong and rich high-fidelity bass for an enhanced immersive experience.

Professional Acoustic Tuning

Golden Ear Tuning Team

With 6 large listening laboratories, 3 large full anechoic laboratories, 11 patented technologies and 9 international honorary awards, the TCL Golden Ear tuning expert team delivers the finest sound quality to you.

Joint tuning with Dolby

Professional tuning, in collaboration with the Dolby Acoustics team, involves in-depth adjustments to sound pressure level, phase synchronization, dynamic range, and other details, achieving a four-dimensional acoustic enhancement.

Acoustic performance optimization

Best acoustic performance for independent use and combination

Adaptation experience optimization

Adjusting adaptation and use experience one by one

Calibration algorithm optimization

Optimizing the spatial soundstage calibration algorithm

Audio-visual system optimization

Systematically and comprehensively verifying product for audio-visual synchronization

Auto Positioning and TV Combined Sound Output

Perfect sound effects tailored for space and device

Dolby Atmos FlexConnect

Place your wireless speakers where you choose for an intelligently optimized Dolby Atmos experience.

Execute automatic positioning to capture full-band audio and achieve precise localization

Calculate the optimal sound-video localization matrix to create an acoustic model

Customize the best soundstage based on positioning and status data

Free Daisy Chaining with 8 Combinations

Perfect sound effects tailored for space and device

Free combination

The product supports free combination of 1 to 4 speakers and is compatible with independent subwoofers, allowing for up to 8 unique combinations. Different colors can also be mixed and matched to meet individual preferences.

Bluetooth Connection

Bluetooth 5.3 connectivity allows mobile phones and tablets to link to the speaker, supporting stereo pairing. The speaker is ready for use upon power-on, transforming your home into an exclusive music scene anytime.

Nebula Colors

The product comes in three nebula-inspired color options, reflecting the splendor and flow of nebulae. This smart design enhances overall aesthetics and seamlessly blends with various home styles.

Astral Appearance Design

Inspired by nature's geometric aesthetics - astral design - and based on a symmetrical five-way radiation structure, this product enhances sound wave convergence and emission, infusing a soft, delicate texture into every detail while seamlessly blending with various home styles.
