Grownsy baby food preparation robot

Model: 5800E

Manufacturer: GROWNSY

EAN: 5905156102637

Product Code: 1687856

R2,176

Grownsy baby food maker

The Grownsy baby food maker is a comprehensive solution for parents who want to have full control over the quality of their child's first meals. The device allows you to steam, blend, manually control the texture, and sterilize food. This allows you to quickly prepare warm and nutritious meals – without having to transfer food to other dishes and without losing nutritional value.

Steaming and blending in one step

The Steam & Blend in One Step function allows you to steam and blend simultaneously in the same container, which simplifies the entire meal preparation process and preserves its full nutritional value. Each portion remains fresh, warm, and ready to serve exactly when your child needs it.

Preserving nutritional value

The basket, which ensures even steam distribution, is designed to heat ingredients effectively without boiling them in water. This solution preserves more water-soluble vitamins, including B and C, as well as valuable minerals such as calcium and iron.

One device, many uses

The Grownsy food processor also functions as a blender, steamer, meat grinder, and juicer. This allows you to easily prepare vegetable purees, meat meals, and thicker consistencies for older children.

Texture tailored to your child's stage of development

Manual mixing control allows you to precisely control the consistency of your food – from very smooth purées for babies from 4 months old, through thicker creams, to more lumpy meals for children over 10-12 months old. This gradual change in texture supports the learning of chewing, swallowing, and proper oral development.

Hygiene and peace of mind at every meal

The high-temperature steam sterilization function ensures that the parts that come into contact with food are clean. This is an additional safeguard that reduces the risk of bacteria growth and allows parents to focus on what is most important – feeding their child.

Safe materials and thoughtful design

All parts of the robot are made of BPA-free materials that are safe for contact with food. The tight-fitting 360° lid prevents ingredients from splashing during operation, protects the motor, and reduces food residue buildup.

A compact everyday helper

Thanks to its small size (300 × 144 × 245 mm) and efficient operation, the Grownsy food processor fits well into the daily routine of parents and caregivers. Simple one-button operation and
