LINDY USB 3.2 Type C cables feature double shielded construction with copper conductors for premium performance and corrosion resistance. Nickel connectors and gold plated contacts maintain signal integrity and reliability.

USB cables with angled plugs protect the USB ports of your devices by reducing pressure and preventing cable breakage, making them ideal for confined spaces and hard-to-reach ports.

Data transfer speeds up to 10Gbps are supported for the quick and effortless transfer of large data volumes.

USB Type C features a reversible connector, so no matter which orientation the cable is inserted, a connection will always be found. This connector allows a fully bi-directional cable with automatic host and device negotiation.
