NEEWER CSF10 10-inch Fresnel Lens Adapter

The NEEWER CSF10 is a professional Fresnel lens adapter that allows you to significantly increase illuminance and control light direction with precision on film or photography sets. Featuring a large 28.8 cm diameter and high light transmission, this accessory effectively focuses the beam, increasing brightness by up to 11.2 times when used with compatible LED lights. The design is optimized for lighting equipment with a Bowens mount rated up to 600W.

Adjustable Beam Angle for Cinematic Control

The adapter allows for smooth adjustment of the beam angle from a wide 35° flood to a focused 10° spot, making it easy to adapt the lighting to any scene and achieve a cinematic look. Adjustments are made via a focus ring; the lens remains stationary during the process, ensuring that the attached barn doors maintain their position and continue to effectively control light spill.

Detachable Barn Doors and Bowens Compatibility

The included metal barn doors allow for precise light shaping and reduced spill, making it easier to set the mood and create creative lighting effects. The integrated Bowens mount ensures broad compatibility with NEEWER LED lights, as well as select models from other manufacturers using the same mounting standard.

Durable Construction and Convenient Transport

The housing is constructed from PC and fiberglass, featuring multiple ventilation holes to support effective heat dissipation during high-power operation. The kit also includes a padded carrying case with a soft interior that protects the lens from scratches and ensures safe transport between locations.

In the Box

- Fresnel lens
- Barn doors
- Carrying bag
- User manual

Specifications

Manufacturer	NEEWER
Model	CSF10
Product type	Fresnel lens adapter
Compatibility	LED lights up to 600W with Bowens mount
Beam angle adjustment	10°–35°
Diameter	28.8 cm
Material	PC, fiberglass
Mount	Bowens
Dimensions	288 × 143 mm
Weight	2.6 kg
