R1,995

Puluz waterproof housing for Insta360 X3 camera

The Puluz waterproof housing allows you to shoot underwater with the Insta360 X3 camera at depths of up to 50 meters! It is made of plastic with high light transmission - the lens material is PMMA with a transmission rate of 95%, which reaches 98% when coated with AR anti-reflective film. Thanks to the unique design of the housing, all blind spots are eliminated. The surface has a hardness of 5H, which is comparable to ordinary glass - it is resistant to fingerprints and scratches. Moreover, the metal parts are made of 304 stainless steel, so there is no need to worry about corrosion.

Included

- Case x 1
- Adapter x 1
