D-Link 5G NR AX3000 Wi-Fi 6 Router

Model: G530

Manufacturer: D-LINK

EAN: 790069476020

Product Code: 1692141

R4,842

Experience Next-Generation 5G Connectivity

5G features unparalleled broadband speeds, low latency, increased bandwidth, wide connectivity compared to 4G network, brings new capabilities to indoor spaces.

Experience Unprecedented Speeds with 5G

Dive into ultra-fast connectivity with 5G NSA mode, offering speeds up to 3.4 Gbps1. The G530 5G NR AX3000 Wi-Fi 6 router ensures you enjoy low-latency, high-speed Internet on both 2.4 GHz and 5 GHz bands, perfect for reliable home entertainment and efficient work.

Plug & Play, Enjoy Fast Connectivity Where You Need

In areas lacking robust network infrastructure, 5G offers a reliable Internet solution where traditional broadband can't reach. The G530 5G NR AX3000 Wi-Fi 6 router brings high-speed internet to the places with limited or no fixed-line access, such as rural locations and temporary setups. Simply by inserting a SIM card, you tap into powerful 5G networks.

Engineered for peak performance, the G530 ensures robust 5G connections across multiple devices simultaneously. Enjoy stable, high-speed Internet for 4K/8K streaming, gaming, and work without the hassle of buffering, dropouts, or interference.

Unlock the Power of Wi-Fi 6

Elevate your wireless connectivity with Wi-Fi 6, offering substantial improvements in coverage, speed, and overall capacity for numerous devices. The G530 leverages Wi-Fi 6 to maximize efficiency, ensuring seamless operation of all your devices. Enjoy smoother streaming, quicker downloads, and uninterrupted online gaming with optimal performance.

Connect More Devices

G530 5G NR Wi-Fi 6 router allows you to access and share your fast mobile broadband with multiple devices simultaneously, so everyone can enjoy efficient Wi-Fi performance and less interference for web browsing, large files downloading or 4K/8K streaming.

Enhanced Secured Network

Elevate the safety of your home or office with the G530, incorporating the latest WPA3 security standard and the prestigious ETSI EN 303 645 cybersecurity certification. These enhances the cybersecurity of consumer IoT devices, encrypting data and fortifying your network against external threats for peace of mind.

Reliable Gigabit Wired Connections

Equipped with one Gigabit Ethernet WAN port and LAN port, G530 can act as a Wi-Fi router for your primary high-intensive wired devices such as PC, smart TV or game console to experience blazing-fast wired connections.

Reliable Backup for Uninterrupted Connectivity

Ensuring smooth online activities, from online video meetings, gaming or e-learning with reliable interruption-free connection. The G530 is equipped with dual-WAN auto-failover technology, automatically switching your internet connection from a 5G NR to a fixed broadband backup network. This keeps you stay online for work, play, and stream, without the worry of lost connectivity.

Silent Efficiency

The Eco-Friendly Choice

The G530 features a fanless design for silent operation, ensuring your work or study sessions are uninterrupted. Its enhanced durability and slim profile make it perfect for small spaces. Moreover, its low power consumption boosts energy efficiency, offering a smarter, eco-friendly connectivity solution.

Easy management with a tap.

Setting up devices becomes a breeze with the Falcon app, allowing you to easily manage your home network from anywhere. Enhance online safety for your children with Parental Controls and ensure a restful night by scheduling Wi-Fi to automatically turn off at bedtime through the Health Mode feature.
