

D-Link DGS-1100-18PV2 network switch Managed L2 Gigabit Ethernet (10/100/1000) Power over Ethernet (PoE) 1U Black

Model: DGS-1100-18PV2

Manufacturer: D-LINK

EAN: 790069453366

Product Code: 1692670

R4,947

Powerful Switching for your Business

The DGS-1100 Series is a range of powerful switches that offer a lot of bang for your buck. They are great for busy SMBs who expect a lot of their network, including support for surveillance and VoIP.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

They are packed with traffic management & optimization features that keep your network congestion free. Meanwhile, management tools are flexible and intuitive, making your life easier.

Easy to Use & Easy to Install

D-Link Network Assistant Utility (DNA) can quickly discover and do initial setup for D-Link Networking devices such as the DGS-1100 Series, which greatly improves efficiency for solution deployment.

VLANs: Stronger Security & Better Traffic Management

Relatively easy to set up, VLANs can be a big boon for your network. They can isolate sensitive areas of your network, keeping them safe from those with malicious intent, or keeping bandwidth open for latency-sensitive traffic such as VoIP.

Green Technology

D-Link Green technology enables the DGS-1100 Smart Managed Switches to save power without sacrificing performance. Most of the models in the series utilize a fanless design, for silent and energy-efficient operation. All are IEEE 802.3az-compliant and feature Link Status detection and Time-Based PoE.

PD Alive Actively Mitigates Downtime

Round-the-clock surveillance footage is vital. If you have Cameras attached to your network, you may have thought technical difficulties were a given. However, the PD-Alive feature actively mitigates device downtime. If a device is not working as expected, the Switch can automatically reset them and get them back online. No need to turn them on and off again in the middle of the night.
