Its aluminum housing helps with both heat control and structural strength. The sleek metal finish complements modern setups while handling demanding use without breaking a sweat.

Data transfer with PD

Transfer data at speeds up to 10 Gbit/s via USB 3.2 Gen 2 ports. The upstream PD port delivers up to 100 W, while a separate 20 W port charges your other devices.

Real-time LED display

An integrated LED display shows live power output, so you always know what your devices are pulling. It's a practical way to stay in control of your power distribution.

Built-In convertible cable

The hub includes a combo USB Type-C® to Type-C®/A cable for maximum compatibility. Whether you're using a new USB Type-C® laptop or an older USB Type-A machine, you're covered without any extra accessories.

Operating system

Works smoothly with both Windows® and macOS®, just plug in and start connecting.

Multi-connectivity

The IB-HUB1743-CPD provides 9 ports, including two USB Type-C® and one USB Type-A that offer data transfer speeds of up to 10 Gbit/s. It also has three additional USB Type-A ports and one USB Type-C® with transfer speeds of up to 5 Gbit/s. You can easily connect multiple devices for stable and reliable performance across your setup.

Solid and durable

Crafted with a solid aluminum body, this hub offers both strength and effective heat control. Its clean, modern look fits well in any setup, while the metal construction supports consistent
