The Anti-reflecting Film helps ensure enhanced visibility with reduced reflections by protecting against dust and fingerprint smudges. Enjoy a clear screen with less glare or rainbow effects while keeping your phone nice and clean.

Less scratches, less dust, all set

Along with its anti-scratch and dust-resistant coating, the Anti-reflecting Film is incredibly easy to apply without creating unwanted air pockets. Just peel off the backing sticker, place it on your phone and you're all set.

Responsive to the touch

Effortlessly unlock your Galaxy S25 FE with just one touch, even with the Anti-reflecting Film applied. The film is crafted for smooth fingerprint recognition and works seemlessly with your preferred case.
