

Zebra MC3330xR handheld mobile computer 10.2 cm (4") 800 x 480 pixels Touchscreen 680 g Black

Model: MC333U-GJ4EG4WR

Manufacturer: ZEBRA

Product Code: 1696228

R87,906

BEST-IN-CLASS RFID READ PERFORMANCE WITH A POWERFUL ANDROID PLATFORM

The MC3300 RFID Series is Zebra’s latest family of integrated UHF/RAIN RFID readers, building on our proven legacy of leading RFID read performance with a future-ready Android mobility platform. Four models are available to meet your customer’s needs: The MC3330R/MC3330xR for standard-

range data capture of RFID tags and barcodes for bulk inventory in retail/hospitality, healthcare, or warehousing/supply chain, and the MC3390R/MC3390xR for long-range data capture in light industrial, warehousing/supply chain, and manufacturing applications. All MC3300 RFID Series models are loaded with innovative features to help generate more productivity and profitability for your business.

BEST OF BOTH WORLDS: RUGGED WITH SUPERIOR ERGONOMICS

Rugged and ready for all-day use with a 5 ft./1.5 m drop specification, IP54 sealing to protect against splashing liquid and dust, and Corning Gorilla Glass touch panel and imager window for maximum scratch-resistance and shatter-proofing. The MC3300 RFID Series is also one of the lightest UHF RFID readers in its class and is built for easy one-handed use, whether workers are right- or left-handed.

FLEXIBLE DEVELOPMENT TOOLS FOR A LOW TCO

Streamline full-fleet rollouts with our EMDK and RFID SDK for Xamarin; the MC3300 RFID Series shares the same RFID Software Development Kit as other Zebra handheld RFID readers. Our EMDK simplifies enterprise application design for faster, more cost-effective development cycles, while our RFID SDK allows you to use the same RFID apps you’ve developed for other Zebra RFID handhelds.

BEST-IN-CLASS RFID READ RATE, RANGE AND ACCURACY

You get unparalleled RFID performance with the MC3300 RFID Series. Zebra’s high-performance ASIC radio technology delivers a read rate that is more than 25% faster and 40% more accurate than other devices in this class*. The MC3390R/MC3390xR can capture RFID tags more than 60 ft./18.2 m away — 200% farther than the next leading competitor, while with the MC3330R/MC3330xR workers can capture RFID tags in half the time as the next leading competitor.
